

TIS
farmaceutic

*Romanian tradition in
pharmaceutical industry*

TIS Farmaceutic is a pharmaceutical company founded in 1997, headquartered in Bucharest, Romania. The company profile consists of developing, manufacturing and marketing pharmaceutical products, food supplements and cosmetics. By means of modern production and quality control technologies **Tis Farmaceutic** acquired the GMP (Good Manufacturing Practices) certification for two production flows (liquid and semisolid forms) since 2004.

The manufacturing and quality management conforms to the European legislation and regulations. In the natural extracts manufacture processes we use our own cultures herbs (plantain, echinacea, calendula, carrot, sage, yarrow) which are pesticide free, for better control, efficacy and safety. The studies regarding pharmaceutical products, standardized in bioactive compounds, have demonstrated their lack of toxicity, their therapeutic action and the possibility to associate these medicines with synthetic drugs, without any interaction.

One of the main development directions is the range of products for respiratory diseases treatment. Our expectorant syrups, containing herbal extracts, are sold on the romanian pharmaceutical market since 2000, being, continously, developed and improved to meet the current regulations, regarding the efficacy and safety of herbal medicines.

Our portfolio includes also dermatology useful products. Topical medication PlantagotTIS®, 20% plantain extract gel, is successfully used, since 2005, to treat superficial thermal burns, abrasions, minor wounds of various etiologies (diabetic ulcers, varicose ulcers, pressure sores, leg ulcers) and skin graft during the healing process of affected tissue.

Propolis exploitation is considered as another development direction in our activity. At first, we acquired the National Medicines Agency authorization to use propolis as raw material in our pharmaceutical products; after that we subsequently used it to obtain several types of standardized extracts. Every extract batch is stadardized and rigorously controlled in our physico-chemical and microbiological laboratories.

Kids and baby massage oil

Description: A pleasant body oil, with moisturizing, emollient and protective properties for baby's sensitive skin.

The combination of bioactive compounds from natural oily extracts gives the product moisturizing, emollient and protective properties, suitable for baby's skin care. It has a pleasant chamomile odour.

Chamomilla recutita flower extract and *Achillea millefolium* extract have antiseptic and soothing properties. Absorbs fast and doesn't leave any greasy feeling.

Composition: *Helianthus annuus* seed oil, *Chamomilla recutita* flower extract, *Achillea millefolium* extract, *Vitis vinifera* seed extract, *Daucus carota sativa* root extract, *Calendula officinalis* flower extract, excipients.

Use: massage into the skin until total absorption.

Packaging: 100 ml bottle

Kids and baby shampoo

Description: Specially formulated for washing and caressing kids and infants sensitive scalp and hair. The shampoo contains natural herbal extracts with moisturizing and emollient properties; the washing formula base, consisting of gentle surfactants, efficiently cleans the hair, without irritating the skin or the eyes.

SLES FREE FORMULA!

Composition: *Plantago lanceolata* leaf extract, *Calendula officinalis* flower extract, *Chamomilla recutita* flower extract, *Glycyrrhiza glabra* root extract.

Use: apply to wet hair, gently massage for 2-3 minutes, then rinse with plenty of warm water.

Packaging: 250 ml bottle

Aromatic lotion with natural extracts & vinegar

Description: The lotion has febrifuge effect by stimulating peripheral circulation, which facilitates toxins elimination through the skin.

Herbal extracts (lavender, sage, peppermint, melissa) have antiseptic, anti-inflammatory, bacteriostatic and antispasmodic action, soothe the skin and protect it against external factors.

Composition: Acetum, *Salvia officinalis* extract, *Lavandula angustifolia* flower extract, *Mentha piperita* leaf extract, *Melissa officinalis* leaf extract, camphor, excipients.

Use: local applications with bare hands or cotton wool.

Packaging: 100 ml bottle

Kids and baby gums gel

Description: Kids and baby gums gel is recommended during dental eruption periods, due to herbal extracts (plantain, chamomile) which have slightly anesthetic, antiinflammatory and antibacterial properties. It can also be used by adults with salivary secretion deficiency (dry mouth).

Composition: *Chamomilla recutita* flower extract, *Plantago lanceolata* leaf extract, excipients.

Use: local applications.

Packaging: 15 ml tube

Baby cream

Description: The cream is specially formulated for baby's sensitive skin care; it prevents diaper rash.

The association of active plant principles (plantain, sea buckthorn and calendula extract) with zinc oxide prevents and calms gluteal erythema, rapidly calms irritations and gives long-lasting protection to naturally sensitive skin or skin that has become irritable.

Paraben-free!

Composition: Zinc oxide, *Calendula officinalis* flower extract, *Hippophae rhamnoides* fruit extract, *Plantago lanceolata* leaf extract, vitamin E, excipients.

Use: apply to the skin in a thin layer and massage gently.

Packaging: 50 ml tube

ARNIKIDS, arnica gel for children

Description: The product has an herbal pleasant odour; after application, it promotes a pleasant coldness feeling and a slight pain relief in case of bruises, edema, contusions and insect bites.

Arnica extract has anti-inflammatory effect, it stimulates blood circulation and accelerates haematoma resorption; Plantain extract activates the natural processes of skin scarring and regeneration.

Composition: *Arnica montana* flower extract, *Plantago lanceolata* leaf extract, *Hypericum perforatum* extract, excipients.

Recommended for:

- Bruises
- Edema
- Contusions
- Muscle pains
- Insect bites

Use: Gentle massage the affected skin area, 2-3 times daily.

Packaging: 20 ml tube

ALFOR-T, cream

Description: Water-soluble cream, quickly absorbable, without leaving any traces; it has antiseptic, astringent and antipruritic properties. Thanks to the combination of astringent/anti-perspirant agents and Composition from oak bark extract, it eliminates the unpleasant smell and discomfort caused by excessive sweating. Abnormal feet sweating can cause irritation (especially on sensitive skin areas between fingers) which can stimulate microorganism and fungus growth. ALFOR-T cream prevents sweat accumulation and decomposition, without stopping this necessary physiological process; due to its antiseptic and astringent action, minimizes pores, thus protecting the skin.

Recommended for: Reduce excessive feet sweating (hyperhidrosis).

TEXTILE FRIENDLY!

Composition: *Quercus robur* bark extract, potassium alum, *Salvia officinalis* extract, *Hyssopus officinalis* extract, menthol, camphor, excipients.

Use: apply a thin product layer on clean and dry skin.

Packaging: 20 ml tube

Body care

ALFOR-T, spray

Description: Liquid spray against excessive feet, forearms and armpits sweating.

Thanks to the combination of astringent/anti-perspirant agents and active herbal ingredients (yarrow, lavender), ALFOR-T spray eliminates the unpleasant smell and discomfort caused by excessive sweating.

Abnormal feet sweating can cause irritation (especially on sensitive skin areas between fingers) which can stimulate microorganism and fungus growth.

ALFOR-T spray prevents sweat accumulation and decomposition, without stopping this necessary physiological process; due to its antiseptic and astringent action, minimizes pores, thus protecting the skin.

TEXTILE FRIENDLY!

Composition: Potassium alum, tartaric acid, *Achillea millefolium* extract, *Lavandula angustifolia* flower extract, excipients.

Use: local applications, if needed.

Packaging: 110 ml spray

Skin cleaning and protecting products

Aloe vera gel

Description: Moisturizing and refreshing gel, suitable for sensitive, dry, toneless and irritated skin.

Recommended in the following cases:

- After or prolonged sun exposure;
- Caressing sensitized skin after epilation/shaving;
- As a hydrophilic mask for affected skin (external factors aggression).

Composition: *Aloe barbadensis* leaf extract, *Chamomilla recutita* flower extract, *Plantago lanceolata* leaf extract, allantoin, excipients.

Use: apply an excessive amount of gel to the affected skin areas.

Packaging: 100 ml tube

Atopic skin cream

Description: It relieves itching/ scratching and restores the skin barrier in case of severe dryness (new-born, children, or adults), as well as in case of atopic tendency and allergies.

The cream can be used in combination with the usual therapy of atopic dermatitis; also it can be administered simultaneously with corticosteroids.

Composition: *Glycyrrhiza glabra* root extract, *Avena sativa* kernel extract, *Plantago lanceolata* leaf extract, squalene, zinc oxide, *Daucus carota sativa* root extract, vitamin A, *Hippophae rhamnoides* fruit extract, vitamin E, panthenol, bentonite, excipients.

Use: apply daily, after bathing, on all areas with dry skin; massage gently after application and wait until complete absorption.

Packaging: 50 ml tube

Repair cream for severe dry skin

Description: Emollient cream, used to restore comfort for skin with atopic tendencies; it prevents the formation of cracks, contributes to good integrity of the epidermis and prevents recurrence.

Properties:

- emollient and moisturizing - thanks to vegetable oils (*Hippophae rhamnoides* fruit extract, *Daucus carota sativa* root extract, *Vitis vinifera* seed extract)
- offers protection of sensitive areas against the proliferation of microorganisms (thanks to the *Inula helenium* extract)
- regenerative - stimulates skin regeneration and improves the overall appearance of the epidermis (*Echinacea purpurea* extract)

Composition: squalene, *Inula helenium* extract, *Echinacea purpurea* extract, *Hippophae rhamnoides* fruit extract, *Vitis vinifera* seed extract, *Daucus carota sativa* root extract, excipients.

Use: apply in a thin layer to areas with dry skin and massage gently, 2 times a day.

Packaging: 50 ml tube

Herbal extracts & 0,2% chlorhexidine lotion

Description: Lotion for hand care and hygiene. It has emollient, moisturizing, protective and cleaning properties due to natural extracts (*Aloe barbadensis* leaf extract, *Achillea millefolium* extract) from its composition.

It promotes skin hygiene thanks to chlorhexidine antibacterial effect.

Composition: 0,2% chlorhexidine digluconate, *Aloe barbadensis* leaf extract, *Achillea millefolium* extract, excipients.

Use: local applications, when needed.

Packaging: 110 ml spray bottle

CutaTIS cream

Description: Ichthyol belongs to the category of tars. It is an agent that normalizes epidermopoiesis process, decreasing the exaggerated proliferation of epidermal keratinocytes. It has local anti-inflammatory, antibacterial and antifungal effects, demonstrated in *in vitro* studies.

Properties:

- anti-inflammatory, reducing local inflammation
- astringent and regenerating, cleaning the affected area and speeding up scarring without traces, thanks to ichthyol and zinc oxide in combination with plant extracts
- antimicrobial, thanks to ichthyol that inhibits the proliferation of epidermal cells
- antipruritic, thanks to plant extracts that act synergistically with active substances
- good adhesion due to the cream-paste consistency
- reduces the exudate (secretions) from injured areas, favouring healing of damaged skin

Indications:

- itching
- dry eczema, with thick, deep crusts
- atonic wounds

Composition: 15% zinc oxide, *Plantago lanceolata* leaf extract, 1,5% ichthammol, *Hyssopus officinalis* extract, *Achillea millefolium* extract, *Salvia officinalis* extract, excipients.

Use: local applications, in a thin layer, as often as needed.

Packaging: 20 ml tube

ATLETIS, gel

Description: ATLETIS gel is indicated to usual use before/after physical effort or in case of any muscle/ligaments and joints strain.

ATLETIS gel is used:

- before exercise to prepare the muscles, mobilize the joints and ligaments, thus reducing the risk of exercise injuries
- after exertion – decontracting massage, muscle relaxant, soothes muscle and joint pain caused by overuse
- It stimulates skin microcirculation, reduces the intensity and duration of muscle fever and helps heal micro-injuries in overworked muscles. Used constantly, it reduces the length of rest needed between workouts.

Composition: *Spiraea ulmaria* extract, *Arnica montana* flower extract, *Salix alba* bark extract, camphor, excipients.

Use: massage affected areas to relaxe and reduce muscle discomfort.

Packaging: 50 ml tube

Venofit cream

Description: Recommended to relieve pain related to peripheral venous circulation disorders (varicose veins) and capillary fragility.

Menthol from peppermint oil promotes a pleasant coldness feeling.

Composition: *Aesculus hippocastanum* seed extract, *Melilotus officinalis* extract, *Vitis vinifera* leaf extract, menthol, camphor, excipients.

Use: apply in a thin layer, with a gentle massage of the affected area.

Packaging: 50 ml tube

ATLETIS, cream

Description: ATLETIS cream is indicated to usual use before/after muscular effort. It deeply warms up and prepares muscles and joints involved in physical activities.

It is used:

- before exercise – to warm up the muscles, mobilize joints and ligaments, thus reducing the risk of exercise injuries
- after exercise – relaxes, soothes muscle and joint pain caused by overuse

Muscle fever is greatly reduced in the targeted muscles, thus making it possible to resume the effort in the shortest time.

Composition: *Spiraea ulmaria* extract, *Salix alba* bark extract, *Capsicum frutescens* fruit extract, menthol, camphor, excipients.

Use: massage affected areas to relaxe and reduce muscle discomfort.

Packaging: 50 ml tube

Venofit gel

Description: It is recommended for tired legs, muscle cramps, cold feet (cooling of the extremities due to poor peripheral circulation). Venofit gel has moisturizing, regenerating and soothing properties, thus toning legs' microcapillaries. Menthol from peppermint oil promotes a pleasant coldness feeling.

Composition: *Aesculus hippocastanum* seed extract, *Vitis vinifera* leaf extract, *Melilotus officinalis* extract, excipients.

Use: apply in a thin layer, with a gentle massage of the affected area.

Packaging: 50 ml tube

RUMATIS cream

Description: Rubefacient and anti-inflammatory cream, thanks to methyl salicylate and herbal extracts.

The product is **recommended for:** muscle and joint pains (caused by fatigue, rheumatism), strains, sprains, sciatic and intercostal neuralgia, bone fractures and insect bites.

The hot pepper extract is a rubefacient agent that reduces local inflammation, relaxes the muscles fibrils and strengthens the microcirculation.
Salix alba bark extract reduces rheumatic-type inflammation.

Composition: methyl salicylate, *Capsicum frutescens* fruit extract, *Salix alba* bark extract, excipients.

Use: local applications, when needed.

Packaging: 50 ml tube

RUMATIS gel

Description: Rumatis gel is a product with fast absorption and immediate effect indicated for the good functioning of the joints.

Salix alba bark extract is rich in compounds derived from salicylic acid, which are best used in rheumatic diseases. These compounds are often associated with *Capsicum frutescens* fruit extract, which has high content of capsaicin with a local heating (revulsive) effect. Hot pepper extract enhances the revulsive effect of *Salix alba* bark and *Spiraea ulmaria* extracts.

Properties: gel with external application for relaxing the joints, improving flexibility and restoring the suppleness of the joints. It calms the joint pain, delays the aging of the cartilages through the revulsive action.

Herbal extracts along with methyl salicylate give the product a pleasant, balsamic smell.

Composition: methyl salicylate, *Spiraea ulmaria* extract, *Salix alba* bark extract, *Capsicum frutescens* fruit extract, excipients.

Use: apply 2-3 times a day or as needed, in a thin layer and gently massage until the gel is completely absorbed into the skin.

Packaging: 50 ml tube

Dermatological products - wounds of different etiologies

CICATRIZIN, spray

Description: Herbal extracts (plantain, licorice, calendula, chamomile) promote epithelization, deep hydration and soothing, especially to erythema-prone skin. Due to bioactive compound's properties, the hydrogel forms a thin layer that protects and restores damaged skin barrier. It is also effective after prolonged exposure to sun and wind.

The product does not contain parabens.

Composition: *Plantago lanceolata* leaf extract, *Glycyrrhiza glabra* root extract, *Chamomilla recutita* flower extract, *Calendula officinalis* flower extract, panthenol, excipients.

Use: apply a slight excess amount of hydrogel to the affected area when necessary.

Packaging: 100 ml spray bottle

CICATRIZIN, ointment

Description: Promotes repair process of injured tissues, stimulating the process of granulation and epithelization in wounds, frostbites and burns. The combination of bioactive compounds from natural extracts provides special therapeutic properties, such as anti-inflammatory and wound healing.

Composition: *Hypericum perforatum* extract, *Calendula officinalis* flower extract, *Symphytum officinale* root extract, *Plantago lanceolata* leaf extract, *Chamomilla recutita* flower extract, excipients.

Use: apply in a thin layer to previously cleaned skin, 2-3 times a day, by gentle massage.

Packaging: 50 ml tube

Sea buckthorn cream

Description: DermoTIS Sea buckthorn cream effectively protects the skin against UV radiation and external factors. The sea buckthorn extract, rich in vitamins (provitamin A) and β -carotene, recommends the use of the product to moisturize dry, aged skin; it has trophic action on the tissues and regenerates tissues.

Composition: *Hippophae rhamnoides* fruit extract, *Plantago lanceolata* leaf extract, excipients.

Use: local applications, in a thin layer, on the affected skin.

Packaging: 50 ml tube

Calendula cream

Description: *Calendula officinalis* extract has anti-inflammatory and rejuvenating properties.

It is recommended for sensitive skin care and hygiene: in new-borns, skin affected by minor burns (sunburns and irritation), mild inflammation.

Composition: *Calendula officinalis* flower oil-soluble extract, excipients.

Use: apply in a thin layer, with a gentle massage of the affected area.

Packaging: 50 ml tube

Arnica montana cream

Description: Arnica cream promotes an immediate pain relief in case of sprains, strains, oedema and contusions. Arnica extract has anti-inflammatory, analgesic, antiseptic and healing properties, stimulating blood circulation. It is recommended for muscle pain, contusions, sprains, ecchymoses and insect bites.

Composition: *Arnica montana* flower extract, *Chamomilla recutita* flower extract, *Ruscus aculeatus* root extract, *Calendula officinalis* flower extract, excipients.

Use: gentle massage the affected skin area, 2-3 times per day.

Packaging: 50 ml tube

Calendula & Propolis cream

Description: Thanks to the combination of propolis and *Calendula officinalis* extract, the product is recommended for the skin restoration after burns, superficial wounds, frostbites and insect bites.

Propolis extract has rejuvenating, antimicrobial and healing properties, while *Calendula officinalis* extract has anti-inflammatory properties, thus enhancing the rejuvenating and healing effect.

Composition: Propolis extract, *Calendula officinalis* flower extract, *Plantago lanceolata* leaf extract, excipients.

Use: apply in a thin layer, with a gentle massage of the affected area.

Packaging: 50 ml tube

Propolis cream

Description: It is recommended for the skin restoration in case of sunburns, radiotherapy, damage due to environmental factors and superficial burns, thanks to its anti-inflammatory, antimicrobial, healing and mild anesthetic action.

Composition: Propolis extract, *Plantago lanceolata* leaf extract, excipients.

Use: apply in a thin layer, with a gentle massage of the affected area.

Packaging: 50 ml tube

Echinacea cream

Description: Recommended for "hard-to-heal" wound care: eczema, furunculosis, herpes lesions.

Echinacea purpurea extract stimulates tissue regeneration due to its antibacterial, antiviral, anti-inflammatory and healing properties.

Composition: *Echinacea purpurea* extract, excipients.

Use: apply in a thin layer, with a gentle massage of the affected area.

Packaging: 50 ml tube

Comfrey cream

Description: Thanks to its allantoin rich content which stimulates the cell proliferation process, it promotes wound (abrasions, eczema) healing, without leaving scars.

Recommended in the treatment of "hard-to-heal" wounds, inflammations of various etiologies.

Composition: *Symphytum officinale* leaf extract (standardised allantoin), excipients.

Use: apply in a thin layer, with a gentle massage of the affected area.

Packaging: 50 ml tube

GlicerTIS, repair, moisturizing & soothing cream

Description: Moisturizing and emollient cream; restores the appearance and tonus of dried, cracked skin (especially on palms, elbows and heels).

The bioactive complex (*Calendula officinalis* flower extract, *Plantago lanceolata* leaf extract, *Vitis vinifera* seed extract, *Daucus carota sativa* root extract) has regenerating and healing properties, and the starch glycerolate provides deep hydration.

After application, the cream forms a protective film that promotes scarring without scales.

Recommendations: skin conditions accompanied by severe dehydration.

Composition: amyloextrin, *Calendula officinalis* flower extract, *Plantago lanceolata* leaf extract, *Vitis vinifera* seed extract, *Daucus carota sativa* root extract, *Persea gratissima* oil, urea, excipients.

Use: local applications on the affected skin.

Packaging: 50 ml tube

DiabeTIS, nourishing & protective cream

Description: Nourishing and protective cream, which promotes skin integrity restoration by its cell reconstructive and trophic action. The association between herbal extracts and other valuable compounds (vitamins, allantoin, natural proteins) develops moisturizing, nourishing, venotonic and soothing effects.

Main properties:

- moisturizing – it prevents skin dryness and dehydration (glycerin, starch)
- it restores skin elasticity (rich in proteins from pollen extract and vitamin E)
- regenerating and epithelizing – it promotes cell regeneration process and restores skin barrier function (vitamin A, *Plantago lanceolata* leaf extract, *Symphytum officinale* root extract, *Daucus carota sativa* root extract)
- tonic – it stimulates microcirculation due to rich flavonoids content (*Aesculus hippocastanum* bark extract, *Ruscus aculeatus* root extract, *Vitis vinifera* leaf extract)
- antipruritic - (due to *Glycyrrhiza glabra* root extract)

Composition: *Glycyrrhiza glabra* root extract, *Plantago lanceolata* leaf extract, amyloextrin, *Aesculus hippocastanum* bark extract, *Symphytum officinale* root extract, *Ruscus aculeatus* root extract, *Hypericum perforatum* extract, vitamin E, *Vitis vinifera* leaf extract, *Daucus carota sativa* root extract, vitamin A, panthenol, pollen extract, excipients.

Use: apply a slight excess on the affected areas twice a day (in the morning and evening). Do not use on damaged skin.

Packaging: 100 ml tube

Ichthammol ointment

Description: In a concentration of 10% ichthammol, the product has antimicrobial properties, cleans and sanitizes the skin, reducing the concentration of microorganisms in the application area. Stimulates the healing processes in case of anal fissures, frostbites, dermatosis, furunculosis.

Properties:

- promotes skin regeneration
- reduces itching and redness
- restores, epithelializes the skin by reducing keratinization
- has a calming effect on the affected skin
- regulates the secretion of the sebaceous glands
- prevents relapses

Composition: 10% ichthammol, petrolatum, lanolin.

Use: apply in a thin layer on the affected area and gently massage

Packaging: 25 ml tube

KeraTIS, vitamin A cream

Description: Rejuvenating and healing cream. **Vitamin A** stimulates cells regeneration and inhibits keratinization, normalizing the skin epithelization process. It is recommended for dry, dull, exfoliated skin.

The combination of *Plantago lanceolata* leaf extract and *Calendula officinalis* flower extract accelerate healing and epithelization processes; after using it, the skin becomes firm and velvety.

Recommended for:

- seborrheic and acne-prone skin care
- dry and wrinkled skin care
- thin skin strenghtening

Composition: *Plantago lanceolata* leaf extract, *Calendula officinalis* flower extract, cholesterol, *Daucus carota sativa* root extract, vitamin A, panthenol, excipients.

Use: local applications, when needed.

Packaging: 20 ml tube

APICRISIN-D, propolis spray

Description: Apicrisin-D, propolis spray is a protective and soothing cutaneous solution. After application, **propolis extract** forms a thin layer over the affected area, that dries out after a while.

The propolis extract contains Composition with antimicrobial, protective and healing properties.

The product has the following effects:

- **protective** - by maintaining the physical-chemical skin barrier and forming a protective layer
- **soothing** - due the anti-inflammatory effect of propolis
- **regenerating** - by stimulating skin rejuvenation processes

Composition: propolis concentrated extract, excipients.

Use: local applications, when needed.

Packaging: 50 ml spray bottle

Arnica montana gel

Description: Arnica gel has anti-inflammatory and pain reliever properties. Arnica extract has anti-inflammatory, analgesic, antiseptic and healing properties, stimulating blood circulation.

Arnica extract stimulates blood circulation and accelerates haematoma resorption. After applying the gel, it promotes a pleasant coldness feeling and the immediate pain relief. It is recommended in case of muscle pain, contusions, sprains, ecchymoses and insect bites.

Composition: natural extracts (*Arnica montana* flower extract, *Hypericum perforatum* extract), excipients.

Use: gentle massage the affected skin area, 2-3 times per day.

Packaging: 50 ml tube

Mentholated paste

Description: Mentholated paste with siccative, astringent and anti-itching properties. The paste is less penetrating and occlusive than most of the creams and ointments.

Recommended in mild skin inflammation, erythema, or wet eczema (weeping eczema); skin irritation accompanied by redness, superficial wounds accompanied by secretions, insect bites, in the treatment of itching related to dermatological disorders (chickenpox, atopic dermatitis).

Hydrophilic base, lanolin free, which promotes the absorption of exudates!

Composition: zinc oxide, talc, *Plantago lanceolata* leaf extract, menthol, excipients.

Use: local applications on affected areas when needed.

Packaging: 50 ml tube

Herbal extracts mentholated lotion

Description: Lotion with moisturizing and soothing properties; induces a pleasant feeling of coolness in case of insect bites, pruritus and heatstrokes.

Composition: zinc oxide, talc, *Mentha piperita* leaf extract, *Arctium lappa* root extract, excipients.

Use: local applications with bare hands or cotton wool.

Packaging: 100 ml bottle

Sulphur cream

Description: DermoTIS Sulphur cream removes skin seborrheic scales. It is a cream with exfoliating properties, due to sulphur and natural extracts, which restores the skin's normal appearance.

Also, vitamin A and D-panthenol stimulate epithelization and inhibit acute skin exfoliation.

Recommended for acne and seborrheic skin care (face and body). It is quickly absorbed through skin and can also be used on skin areas covered by hair.

Composition: 7% sulphur, *Salvia officinalis* extract, *Achillea millefolium* extract, salicylic acid, panthenol, vitamin A, excipients.

Use: thin layer local applications, 1-2 times a day; it can be water washed.

Packaging: 50 ml tube

Pimple defense lotion with cranberry extract

Description: Pimple defense lotion, with astringent, antiseptic and healing properties. It is a skin-friendly lotion, with gentle effect, which contains a blend of ingredients with synergistic action, thus fighting common acne problems, such as seborrhea, blackheads and pimples.

The starch and the zinc oxide absorb skin's exudations and secretions.

The cranberry leaves extract and the camphor have a slightly antiseptic action on sensitive skin.

Composition: *Vaccinium vitis-idaea* leaf extract, *Achillea millefolium* extract, zinc oxide, amyloextrin, camphor, cetrimonium bromide, benzalkonium chloride, excipients.

Use: local applications 2-3 times per day on affected areas

Packaging: 60 ml bottle

Anti-acne cream

Description: Anti-acne Cream balances sebum secretions, contributes to black heads removal and protects sensitive skin against harmful factors (dust, wind, excessive heat). The cream has moisturizing, firming and revitalizing properties, thanks to the combination of natural extracts, vitamin A and avocado oil.

The cream is quickly absorbed, leaving a pleasant feeling of smoothness. Vitamin A enhances the cream effect by its regenerative properties.

Suitable for oily and acne-prone skin!

Composition: vitamin A, allantoin, niacinamide (vitamin B3), herbal extracts (*Salvia officinalis* extract, *Achillea millefolium* extract, *Plantago lanceolata* leaf extract, *Avena sativa* kernel extract, *Olea europaea* fruit oil, *Melissa officinalis* leaf extract), niacinamide (vitamin B3), oil-soluble extracts (*Vitis vinifera* seed extract, *Daucus carota sativa* root extract), excipients.

Use: local applications in a thin layer 1-2 times per day; apply to previously cleaned skin.

Packaging: 50 ml tube

Anti-acne lotion

Description: Due to its abundance in plant extracts, our lotion can improve the appearance of acne-prone skin and restore its appearance without scars. The product does not dry the skin, thus leaving it smooth and with a velvety texture.

Salix alba extract is rich in natural compounds of salicylic acid, has keratolytic properties and can reduce the corneous layer of the skin.

Salvia officinalis extract along with *Achillea millefolium* extract have purifying and astringent properties, releasing the pores. Also, the association of these extracts with zinc gluconate prevents proliferation of microorganisms.

Plantago lanceolata leaf extract has a healing effect, reduces inflammation and stimulates cell regeneration.

Composition: zinc gluconate, herbal extracts (*Plantago lanceolata* leaf extract, *Salix alba* bark extract, *Salvia officinalis* extract, *Achillea millefolium* extract, *Spiraea ulmaria* extract, *Populus nigra* bud extract), excipients.

Use: local applications on affected area when needed.

Packaging: 50 ml spray bottle

Anti-acne stick

Description: Cleans, protects and restores the affected epidermis.

Composition: copper sulfate, zinc oxide, zinc gluconate, *Ricinus communis* oil, *Vitis vinifera* seed extract, *Hippophae rhamnoides* fruit extract, *Persea gratissima* oil, *Plantago lanceolata* leaf extract, *Achillea millefolium* extract, *Salvia officinalis* extract, excipients.

Use: local applications.

Packaging: 4 g lipstick case

Adjuvants in dermatology - hemorrhoidal conditions

HEMOPROP

Description: Antipruritic cream, with natural extracts (Propolis extract and *Populus nigra* bud extract) to protect and maintain integrity of congested areas, especially the perianal area, by reducing itching and stinging. Accelerates scarring and epithelization due to the rich content of plantain and calendula extracts. The association of dermatol with natural extracts gives the product antiseptic, astringent and non-irritating drying properties.

Composition: *Glycyrrhiza glabra* root extract, *Quercus robur* bark extract, *Plantago lanceolata* leaf extract, Propolis extract, *Populus nigra* bud extract, *Calendula officinalis* flower extract, bismuth subgallate (dermatol), excipients.

Use: apply, when necessary, on the affected skin section, especially in the perianal area.

Packaging: 50 ml tube

15% - Urea cream

Description: Emollient and healing cream, suitable for devitalized and thinned skin. Enriched in natural **wheat germ oil-soluble extract**, which contains essential fatty acids, natural proteins, and vitamin E, it promotes deep skin hydration and restores the hydrolipidic balance. The bioactive compounds also have antimicrobial and healing properties.

We recommend the use of **15% UREA CREAM**, after prior removing the unpleasant scales and excessive stratum corneum skin layer using **30% UREA CREAM**.

Composition: 15% urea, *Triticum vulgare* germ extract, *Plantago lanceolata* leaf extract, *Glycyrrhiza glabra* root extract, lactic acid, *Calendula officinalis* flower extract, *Daucus carota sativa* root extract, excipients.

Use: apply only to the affected areas when necessary.

Packaging: 50 ml tube

30% - Urea cream

Description: It removes the unpleasant skin scales, soothes itching and prevents fungal infections occurrence, related to various skin conditions (dermatitis, psoriasis, ichthyosis, calluses, keratoses).

Composition: 30% urea, *Triticum vulgare* germ extract, *Quercus robur* bark extract, lactic acid, salicylic acid, excipients.

Use: Apply a thick product layer, on the pre-cleaned affected skin areas, 3-4 times per day.
Apply only on intact skin. Do not apply on mucous membranes.

Packaging: 50 ml tube

PsoriTIS Rejuvenating milk

Description: PsoriTIS Rejuvenating milk has moisturizing, emollient and regenerating action over thickened skin, affected by dehydration and scales (related to irregular cell division processes). PsoriTIS Rejuvenating milk slows the excessive thickening of stratum corneum, promoting scales removal and preventing its recurrence. The milk's texture is designed so that it moisturizes, soothes, relieves discomfort, restores the protective hydrolipidic film of the skin, thus regaining its elasticity and normal appearance.

Recommended for:

- healing, moisturizing, rejuvenating thin and dry skin, which requires continuous care, to avoid excessive dehydration, cracking and microbial contamination
- dry skin, covered with scales, all over the body (including hairy skin)

Composition: urea, caffeine, *Glycyrrhiza glabra* root extract, *Triticum vulgare* germ extract, *Plantago lanceolata* leaf extract, *Daucus carota sativa* root extract, vitamin A, vitamin E, excipients.

Use: Apply enough product and gently spread it on the affected skin areas, until total absorption once or twice a day. Alternative use with PsoriTIS cream is recommended, depending on the skin condition and appearance.

Packaging: 100 ml tube

PsoriTIS cream

Description: PsoriTIS Cream has keratolytic, emollient and moisturizing properties; suitable for dry & exfoliated skin. It cleans the skin by removing the unpleasant scales (urea) and inhibits the scale formation process (caffeine). It has moisturizing, emollient and healing effect (me and vitamin A). Specially formulated (hydrophilic base) to be applied also on covered by hair areas; it can be easily removed by simple washing.

Composition: 7% urea, *Triticum vulgare* germ extract, *Plantago lanceolata* leaf extract, salicylic acid, caffeine, *Symphytum officinale* leaf extract, *Calendula officinalis* flower extract, vitamin A, lactic acid, excipients.

Use: apply the cream once or twice a day and gently massage until it is fully absorbed.

Packaging: 50 ml tube

PsoriTIS 10% Urea shampoo

Description: PsoriTIS shampoo is perfect for the hygiene and care of seborrheic scalp, prone to psoriasis, seborrheic dermatitis, dandruff, pityriasis and ichthyosis. The shampoo has moisturizing, regenerating and keratolytic properties, suitable for dry and damaged hair care. It efficiently promotes the removal of scales related to psoriasis.

Ruscus aculeatus extract activates the microcirculation of the hair root.

Triticum vulgare germ extract and *Avena sativa* kernel extract nourish the hair and scalp, due to rich natural protein content.

Mild, non-irritant washing base, suitable for sensitive scalp!

Composition: 10% urea, *Avena sativa* kernel extract, *Tagetes erecta* flower extract, *Ruscus aculeatus* root extract, *Achillea millefolium* extract, *Triticum vulgare* germ extract, lactic acid, excipients.

Use: apply to wet hair, gently massaging the roots, insisting on the scale-covered areas. Let the shampoo sit for 5 minutes, then rinse with plenty of warm water, avoiding contact with eyes.

We recommend using the product twice a week for maximum 6 weeks.

Packaging: 120 ml bottle

Hair care

Anti-dandruff climbazole shampoo

Description: It removes already existing dandruff and prevents formation of the new one; it soothes scalp itching, leaving the hair clean and silky.

The combination of climbazole, salicylic acid and herbal extracts gives the shampoo complementary **properties:**

- it inhibits the factors responsible for dry, fine and white scales formation (due to climbazole) it removes the adherent scales from hair and scalp (due to salicylic acid) it relieves scalp discomfort (itching, redness), regenerates and nourishes the hair (due to D-panthenol and herbal extracts).

Composition: salicylic acid, *Quercus robur* bark extract, *Betula alba* leaf extract, *Plantago lanceolata* leaf extract, climbazole, D-panthenol, excipients.

Use: Apply to wet hair, gently massaging the roots.

Let the shampoo sit for 10 minutes (for optimal contact with the affected scalp), then rinse with plenty of warm water, avoiding contact with eyes.

Packaging: 120 ml bottle

Anti-seborrheic shampoo

Description: Anti-seborrheic shampoo removes the adherent hair scales, soothes the irritated skin areas, improves scalp itching and erythema.

The product has skin healing properties; it also protects skin prone to infection.

Recommended in:

- seborrheic dermatitis
- chronic scales conditions
- excessive seborrheic secretions

Composition: ichthammol, salicylic acid, resorcinol, *Plantago lanceolata* leaf extract, *Quercus robur* bark extract, *Achillea millefolium* extract, *Calendula officinalis* flower extract, *Salvia officinalis* extract, excipients.

Use: active treatment (3 weeks): 3-4 times per week; daily care treatment: 1-2 times per week

Apply to wet hair, gently massaging the roots. Let the shampoo sit for 5 minutes (for optimal contact), then rinse with plenty of warm water, avoiding contact with eyes.

Packaging: 120 ml bottle

Medicinal shampoo

Description: Antimicrobial and anti-seborrheic shampoo; it removes scalp scales and unpleasant odours related to different disorders (seborrheic dermatitis, dandruff).

The Composition are included into a washing base that ensures optimal effect and an efficient washing. The synergistic action of the ingredients promotes a consistent decrease of seborrheic secretion. Thus, the shampoo reduces the already existing dandruff and ceases the formation of the new one.

Recommended for: dandruff, seborrheic dermatitis, psoriasis.

Composition: *Quercus robur* bark extract, *Betula alba* leaf extract, salicylic acid, *Salix alba* bark extract, *Tagetes erecta* flower extract, *Melissa officinalis* leaf extract, resorcinol, allantoin, menthol, excipients.

Use: apply to wet hair, rub the scalp for about 5 minutes (for optimal contact), then rinse with plenty of warm water. The shampoo can be applied once or twice a week, but not more than 30 days. Afterwards it is recommended to use MEDICINAL SHAMPOO for DAILY CARE.

Packaging: 120 ml bottle

Sulphur shampoo

Description: The shampoo cleans and strengthens greasy hair; it is specially formulated for seborrheic scalp care.

It prevents hair loss and dandruff formation; it reduces excessive seborrheic secretion, which favours the scale formation.

Composition: sulphur, *Quercus robur* bark extract, *Arctium lappa* root extract, excipients.

Use: active treatment (3 weeks): 3-4 times per week; daily care treatment: 1-2 times per week.

Apply to wet hair, gently massaging the roots. Let the shampoo sit for 5 minutes (for optimal contact), then rinse with plenty of warm water, avoiding contact with eyes.

Packaging: 100 ml bottle.

Medicinal shampoo for daily use (care)

Description: The shampoo efficiently cleans the sensitive scalp; it strengthens the hair bulb, degreases and rejuvenates the hair, restoring its volume, glow and suppleness. Recommended for in case of: Dandruff, hair loss, damaged hair.

Composition: *Quercus robur* bark extract, *Plantago lanceolata* leaf extract, *Calendula officinalis* flower extract, resorcinol, salicylic acid, *Urtica dioica* extract, *Melissa officinalis* leaf extract, *Chamomilla recutita* flower extract, menthol, excipients.

Use: apply to wet hair, rub the scalp for about 5 minutes (for optimal contact), then rinse with plenty of warm water.

For best results, it is recommended to use the MEDICINAL SHAMPOO for one month, and afterwards the MEDICINAL SHAMPOO for DAILY CARE.

Packaging: 120 ml bottle

Acetone with Aloe vera extract, keratin & D-panthenol

Description: It revitalizes and nourishes nails affected by repeated application of nail polish.

After using it, the nails do not become opaque or dry.
Allows uniform application of a new nail polish layer.

Composition: acetone, *Aloe barbadensis* leaf extract, keratin, D-panthenol, excipients.

Use: apply it to nails with a soaked cotton ball to dissolve the polish.

Packaging: 60 ml bottle

Glycerin hand cream

Description: Hand cream enriched in glycerin and oil-soluble herbal extracts, specially formulated to protect hands affected by frequent washing.

Herbal extracts provide long lasting moisture, giving the skin a velvety feel. After application, it is quickly absorbed, without leaving greasy or sticky feeling.

For personal and professional care!

Composition: glycerin, *Calendula officinalis* flower extract, *Vitis vinifera* seed extract, *Vitis vinifera* leaf extract, *Daucus carota sativa* root extract, excipients.

Use: apply a thin layer, on clean and dry hands and gentle massage until totally absorbed. During nighttime, after applying the cream, cotton gloves can be used for intensive hydration effect.

Packaging: 100 ml tube

Hand care

Hand balm

Description: Nourishing hand balm, suitable for dehydrated skin affected by ageing processes, harmful external factors and brown spots.

Properties:

moisturizing (urea – natural moisturizing factor)

nourishing (cholesterol, vitamin C, herbal oils)

rejuvenating (vitamin A, herbal extracts)

The combination of herbal extracts (*Persea gratissima* oil, *Vitis vinifera* seed extract, *Daucus carota sativa* root extract, *Hippophae rhamnoides* fruit extract, *Aloe barbadensis* leaf extract, *Salvia officinalis* leaf extract, *Chamomilla recutita* flower extract), vitamin C and urea promotes mitigation and prevention of brown spots for a healthy and velvety skin. After application, the skin becomes smooth and appearance is visibly improved; it quickly absorbs, without leaving greasy or sticky feeling.

Composition: urea, *Aloe barbadensis* leaf extract, *Salvia officinalis* leaf extract, cholesterol, *Melissa officinalis* leaf extract, *Vitis vinifera* seed extract, *Chamomilla recutita* flower extract, *Daucus carota sativa* root extract, *Persea gratissima* oil, lactic acid, vitamin A, vitamin C, *Hippophae rhamnoides* fruit extract, excipients.

Use: apply a thin layer, on clean and dry hands and gentle massage until totally absorbed.

Packaging: 100 ml tube

Emollient hand cream

Description: Hand cream with nourishing, moisturizing and emollient properties.

Protects the skin against harmful external agents (cold, wind, heat, moisture, detergents).

The combination of herbal extracts (*Malva sylvestris* extract, *Chamomilla recutita* flower extract, *Hippophae rhamnoides* fruit extract, *Triticum vulgare* germ extract, *Salvia officinalis* extract, *Calendula officinalis* flower extract, *Daucus carota sativa* root extract) and vitamins (A, E) moisturizes, soothes and protects the hands.

Composition: glycerin, *Malva sylvestris* extract, *Chamomilla recutita* flower extract, *Hippophae rhamnoides* fruit extract, *Triticum vulgare* germ extract, *Salvia officinalis* extract, *Calendula officinalis* flower extract, vitamin A, vitamin E, *Daucus carota sativa* root extract, excipients.

Use: apply a thin layer, on clean and dry hands and gentle massage until totally absorbed.

Packaging: 100 ml tube

Hand care

REGETIS, cuticle and nail care oil

Description: REGETIS prevents nail cracking and peeling; also, softens cuticles to be easily removed. It contains herbal oil-soluble extracts with emollient and nourishing properties.

Composition: *Calendula officinalis* flower extract, *Hippophae rhamnoides* fruit extract, *Triticum vulgare* germ extract, *Vitis vinifera* seed extract, vitamin E, panthenol, excipients.

Use:

nails/cuticles: apply a drop of oil on nail root and massage until completely absorbed; use for 2-3 weeks
hands: apply 5-6 drops on hand skin and massage until completely absorbed

Packaging: 20 ml bottle

Urea & natural herbal extracts

7% Urea cuticle gel

Description: Strengthens and moisturizes the fragile, dull nails, restoring their shine, vitality and healthy appearance. It also moisturizes the dry, harsh skin areas (from palms, feet, elbows, fingers, knees, heels).

Applied to the nail base, facilitates the unpleasant cuticles removal.

Composition: urea, glycerin, hydroxyethyl cellulose, vitamin E, lactic acid.

Use: apply to the affected area 2-3 times per day.

Packaging: 20 ml tube

Arnica massage cream

Description: Nourishing cream, suitable for an extended massage, in rheumatic, joint and muscle pains related to physical effort, kinesiotherapy.

For professional and personal care!

Arnica montana flower extract stimulates blood circulation and accelerates the resorption of hematomas. During application it produces a cooling sensation and immediate pain relief.

Composition: *Arnica montana* flower extract, *Melissa officinalis* leaf extract, *Achillea millefolium* extract, *Vitis vinifera* seed oil-soluble extract, excipients.

Use: apply daily in a thin layer and gentle massage until absorption.

Packaging: 150 ml tube

Massage cream

Description: Nourishing cream with dense texture, suitable for an extended massage. It is a dense-textured, non-greasy cream, which can easily penetrate the skin, thus being suitable for either professional or routine massage. It moisturizes and stimulates skin micro-circulation due to the combination of herbal extracts (*Hedera helix* leaf extract and *Glycyrrhiza glabra* root extract) and oil soluble (*Vitis vinifera* seed extract, *Calendula officinalis* flower extract, *Triticum vulgare* germ extract). The cream is also recommended for professional massage, promoting cellulite attenuation by mechanical drainage.

Composition: *Hedera helix* leaf extract, *Glycyrrhiza glabra* root extract, *Vitis vinifera* seed extract, *Calendula officinalis* flower extract, *Triticum vulgare* germ extract, excipients.

Use: apply to the affected area and massage until completely absorbed.

Packaging: 500 ml jar

Body care

Body cream with herbal extracts and natural oils

Description: Emollient cream with moisturizing and nourishing properties. The bioactive principles from **herbal extracts** (*Achillea millefolium* extract, *Chamomilla recutita* flower extract, *Arnica montana* flower extract, *Malva sylvestris* extract, *Arctium lappa* root extract, *Calendula officinalis* flower extract) and the moisturizer factor consisting of **urea-lactic acid-D-panthenol**, maintain and restore the skin natural elasticity and firmness. **Oil-soluble herbal extracts** (*Triticum vulgare* germ extract, *Vitis vinifera* seed extract) and **avocado oil** (*Persea gratissima* oil) have emollient and nourishing properties due to the rich content of vitamins and fatty acids. After use, the skin regains its normal appearance.

For professional and personal care!

Composition: *Achillea millefolium* extract, *Chamomilla recutita* flower extract, *Arnica montana* flower extract, *Malva sylvestris* extract, *Arctium lappa* root extract, *Calendula officinalis* flower extract, oil-soluble *Triticum vulgare* germ extract, *Vitis vinifera* seed extract, *Persea gratissima* oil, urea, lactic acid, D-panthenol, vitamin E, excipients.

Use: apply daily in a thin layer and gentle massage until absorption.

Packaging: 150 ml tube

Anti-stretch mark cream

Description: Provides long lasting skin moisturizing; attenuates the existing stretch marks and prevents formation of new ones. *Lavandula angustifolia* flower extract, *Salvia officinalis* leaf extract and *Vitis vinifera* leaf extracts normalize skin micro-circulation and stimulate collagen synthesis, restoring skin's tonicity and elasticity. **Vitamin E, D-panthenol** and *Triticum vulgare* **germ oil-soluble extract** have antioxidant and rejuvenating properties. It also contains *squalene*, which is a natural emollient. After use, the skin regains its normal appearance.

Also suitable for pregnant women skin care!

Composition: *Lavandula angustifolia* flower extract, *Hedera helix* leaf extract, squalene, *Vitis vinifera* leaf extract, *Capsicum annuum* fruit extract, *Triticum vulgare* germ extract, *Hippophae rhamnoides* fruit extract, *Arnica montana* flower extract, *Glycyrrhiza glabra* root extract, *Salvia officinalis* leaf extract, allantoin, panthenol, vitamin E, *Lavandula angustifolia* oil, excipients.

Use: apply to the affected areas and massage for 1-2 minutes, daily, for a longer period (minimum one month). Best used after bathing.

Packaging: 500 ml jar

Body care

Anti-cellulite cream

Description: This cream fights against cellulite and excessive body fat (from abdomen, thighs, hips) by stimulating local blood circulation and cell metabolism. The combination of **herbal extracts** (*Capsicum frutescens* fruit extract, *Hedera helix* leaf extract, *Vitis vinifera* leaf extract, *Aesculus hippocastanum* bark extract), **oil-soluble extracts** (*Capsicum frutescens* fruit extract, *Triticum vulgare* germ extract, *Tagetes erecta* flower extract, *Hippophae rhamnoides* fruit extract) and **caffeine** enhances the anti-cellulite effect.

Composition: *Capsicum frutescens* fruit extract, *Hedera helix* leaf extract, caffeine, *Tagetes erecta* flower extract, *Aesculus hippocastanum* bark extract, *Triticum vulgare* germ extract, *Vitis vinifera* seed extract, *Hippophae rhamnoides* fruit extract, *Ruscus aculeatus* root extract, *Vitis vinifera* leaf extract, cholesterol, excipients.

Use: apply daily in a thin layer and gently massage the affected area until fully absorbed.

Packaging: 500 ml jar

Sunscreens

Massage oil

Description: Specially formulated for massage use, the product invigorates the skin by stimulating microcirculation. It contains a high concentration of **grape seeds oily extract**, with special low-density properties, which easily penetrates the skin. Its complex composition induces strong antioxidant properties; the product promotes uniform tanning, protecting the skin against harmful solar radiation.

Recommended for:

- relaxing massage
- epidermal cells rejuvenation, especially after surgery, radiotherapy, chemotherapy
- skin protection against UV radiation
- skin moisturizing, to prevent aging
- improving appearance of rough or overworked hands (due to physical or chemical agents)

Composition: *Vitis vinifera* seed extract, *Lavandula angustifolia* flower extract, *Chamomilla recutita* flower extract, *Salvia officinalis* extract, *Hypericum perforatum* extract, *Helianthus annuus* seed oil, excipients.

Use: apply the product on the affected area and gently massage until fully absorbed.

Packaging: 150 ml bottle

Soothing face cream

Description: Protective and nourishing cream, recommended for irritated and congested skin with red spots.

Favours reduction of capillary fragility and prevents diffuse redness on the skin (due to *Melilotus officinalis* extract and vitamin B3).

Ruscus aculeatus root extract, *Vitis vinifera* leaf extract and *Hedera helix* leaf extract have a tonic effect and stimulate skin microcirculation.

Allantoin can reduce erythema and diffuse redness of the face. Contains natural proteins from *Avena sativa* kernel extract gives to the cream nutritious properties; vitamin E and vegetable oils ensure optimal and long-lasting hydration. The cream protects skin against solar radiation, therefore it can be used as a make-up base.

Composition: *Avena sativa* kernel extract, *Vitis vinifera* leaf extract, *Melilotus officinalis* extract, *Hippophae rhamnoides* fruit extract, *Ruscus aculeatus* root extract, *Lavandula angustifolia* flower extract, *Tagetes erecta* flower extract, *Salvia officinalis* extract, *Arnica montana* flower extract, *Hedera helix* leaf extract, squalene, allantoin, vitamin E, vitamin B3

Use: apply to the face and neckline in the morning

Packaging: 50 ml tube

Multi-protective Plus day cream

Description: Promotes brown spots depigmentation, protects the skin against harmful UV radiation, contributes to obtain tan uniformity after sun exposure.

A complex cream formula, based on the combination of natural arbutin (from cranberry leaves extract), vitamin C (antioxidant agent) and carotenes from oil-soluble extracts. Vitamin C also enhances arbutin depigmentation effect, providing a strong protection against harmful factors. SPF: 15

Composition: *Vaccinium vitis-idaea* leaf extract, *Hippophae rhamnoides* fruit extract, *Butyrospermum parkii* butter (shea butter), *Calendula officinalis* flower extract, *Vitis vinifera* seed extract, *Daucus carota sativa* root extract, titanium dioxide, *Theobroma cacao* seed butter, excipients.

Use: apply twice a day, on clean skin, under gentle massage; in the morning, before applying make-up and in the evening, after cleansing process.

Packaging: 50 ml jar

Multi-protective day cream

Description: The natural complex, consisting of oil-soluble extracts, avocado oil and vitamin E, restores skin suppleness and freshness, protecting it from harmful external factors (UV, wind, cold, humidity, pollution).

Calendula officinalis flower extract, *Hippophae rhamnoides* fruit extract and *Daucus carota sativa* root extract are a natural source of carotenes – chemical compounds that reduce the ageing effects and protect the skin against UV radiation. Zinc oxide and titanium dioxide are mineral sunscreens, that protect the skin against UV radiation; they do not penetrate the skin, thus, do not cause allergies or skin irritations. *Glycyrrhiza glabra* root extract, *Chamomilla recutita* flower extract and *Achillea millefolium* extract soothe irritations and stimulate skin microcirculation. Suitable for all skin types! SPF: 10

Composition: *Calendula officinalis* flower extract, *Hippophae rhamnoides* fruit extract, *Glycyrrhiza glabra* root extract, *Butyrospermum parkii* butter (shea butter), *Persea gratissima* oil, *Vitis vinifera* leaf extract, *Achillea millefolium* extract, *Tagetes erecta* flower extract, *Theobroma cacao* seed butter, *Chamomilla recutita* flower extract, *Daucus carota sativa* root extract, vitamin E, zinc oxide, titanium dioxide, excipients.

Use: apply daily on clean skin, under a light massage; it can also be used as a make-up base or in the evening after make-up removal.

Packaging: 50 ml jar

Whitening mask with arbutin

Description: Whitening mask, containing natural arbutin (from cranberry leaves extract), vitamin C and herbal bioactive compounds, which promotes brown spots depigmentation and prevents the formation of new ones. The mask reduces hyperpigmentation and restores skin brightness and tonus, by inhibiting melanin synthesis (due to natural arbutin). Vitamin C, with strong antioxidant effect, enhances arbutin action.

The mask also protects the skin against harmful external factors. SPF: 10

Composition: *Vaccinium vitis-idaea* leaf extract, *Glycyrrhiza glabra* root extract, cholesterol, kaolin, *Vitis vinifera* seed extract, *Chamomilla recutita* flower extract, *Achillea millefolium* extract, bentonite, *Daucus carota sativa* root extract, vitamin C, excipients.

Use: apply under light massage (for complete absorption of Composition) on the face and neckline and keep for 30 minutes. It can be removed if necessary.

We recommend using it 3-4 times per week.

Packaging: 50 ml jar

Whitening cream

Description: The cream promotes brown spots depigmentation and protects the skin against free radicals' harmful action; its advanced formula prevents skin water loss, restoring natural elasticity and smoothness.

The active herbal complex consisting of *Glycyrrhiza glabra* root extract and oil-soluble herbal extracts (*Hippophae rhamnoides* fruit extract, *Calendula officinalis* flower extract, *Chamomilla recutita* flower extract, *Daucus carota sativa* root extract, *Triticum vulgare* germ extract, *Salvia officinalis* extract) enhances the vitamin C whitening effect.

The carotenoid complex and the zinc oxide are mineral sunscreens, protecting the skin against harmful UV radiation, which intensifies brown spots.

SPF: 10

Composition: *Glycyrrhiza glabra* root extract, *Hippophae rhamnoides* fruit extract, *Calendula officinalis* flower extract, *Vaccinium vitis-idaea* leaf extract, zinc oxide, *Vitis vinifera* seed extract, cholesterol, *Chamomilla recutita* flower extract, *Daucus carota sativa* root extract, *Vitis vinifera* leaf extract, vitamin C, vitamin E, *Triticum vulgare* germ extract, *Salvia officinalis* extract, vitamin B3, excipients.

Use: apply to the skin and gently massage with circular movements, prior to sun exposure.

Packaging: 50 ml jar

Ceramides anti-wrinkle cream

Description: Thanks to ceramides and herbal oil-soluble extracts – a combination of original and modern bioactive compounds – this cream is provided with special skin care properties; it prevents wrinkle formation and attenuates the existing ones. Ceramides – structurally skin compatible compounds – form a protective film that retains the optimal amount of water in the intracellular matrix, preventing and attenuating wrinkles. The carotenoids from *Hippophae rhamnoides* fruit extract – powerful antioxidants – form an effective UV filter.

Oil-soluble herbal extracts (*Chamomilla recutita* flower extract, *Lavandula angustifolia* flower extract, *Calendula officinalis* flower extract) prevent premature skin ageing, soothe irritations and restore skin natural properties (tonus, elasticity, firmness).

Suitable for all skin types!

Composition: *Chamomilla recutita* flower extract, *Hippophae rhamnoides* fruit extract, *Calendula officinalis* flower extract, ceramides, *Vitis vinifera* seed extract, *Lavandula angustifolia* flower extract, *Triticum vulgare* germ extract, vitamin E, *Echinacea purpurea* extract, *Daucus carota sativa* root extract, *Tagetes erecta* flower extract, excipients.

Use: apply daily on clean skin, under a light massage, in the direction of wrinkles formation.

Packaging: 50 ml jar

Royal jelly anti-wrinkle cream

Description: Nourishing cream, with emollient and rejuvenating effect; soothes the skin and prevents wrinkle occurrence.

The combination of natural extracts and apitherapeutic products (royal jelly, bees honey) induces an intense moisturizing effect and prevents premature ageing.

Suitable for all skin types!

Composition: mel, *Triticum vulgare* germ extract, *Achillea millefolium* extract, *Hippophae rhamnoides* fruit extract, *Butyrospermum parkii* butter (shea butter), Pollen extract, *Calendula officinalis* flower extract, Royal jelly, Propolis cera, *Vitis vinifera* seed extract, excipients.

Use: apply daily on clean skin, under a light massage, in the direction of wrinkles formation.

Packaging: 50 ml jar

Anti-age cream

Description: It helps aged, damaged and dry skin, to regain its elasticity; it prevents wrinkle formation and attenuates the existing ones.

An original formula containing active herbal ingredients (natural ursolic acid from lavender, echinacea, ivy, chamomile, marigold) and high concentration of vitamin C. It also attenuates hyperpigmentation and ageing spots. The cream base instantly penetrates the skin, being easily absorbable.

The product was specially formulated for moisturizing dry and sensitive skin, but it is also protecting the skin against UV radiation. Synthetic perfume free!

Composition: *Lavandula angustifolia* flower extract, *Echinacea purpurea* extract, cholesterol, Pollen extract, *Calendula officinalis* flower extract, *Salvia officinalis* extract, *Vitis vinifera* leaf extract, *Tagetes erecta* flower extract, *Avena sativa* kernel extract, *Chamomilla recutita* flower extract, *Hedera helix* leaf extract, vitamin C, excipients.

Use: apply daily on clean skin, under a light massage, in the direction of wrinkles formation.

Packaging: 50 ml jar

Propolis anti-wrinkle cream

Description: Emollient cream with antimicrobial and healing properties, recommended for caressing dry skin, sensitive to environmental factors (cold/excessive heat, wind, irradiation).

It contains natural composition, which stimulates skin rejuvenation; the skin-friendly base prevents wrinkle formation and attenuates the existing ones. Thanks to the rich propolis content, the cream caresses dry, sensitive skin, prone to infection.

Composition: Propolis extract, cholesterol, squalane, *Vaccinium vitis-idaea* leaf extract, *Vitis vinifera* seed extract, *Salvia officinalis* extract, *Chamomilla recutita* flower extract, *Daucus carota sativa* root extract, mel, *Lavandula angustifolia* flower extract, excipients.

Use: apply the cream on clean skin, daily, under gentle circular movements.

Packaging: 50 ml jar

Wheat germ anti-wrinkle cream

Description: Nourishing cream, suitable for dry, aged skin and wrinkle prevention. The product contains a natural bioactive complex consisting of oil-soluble herbal extracts (wheat germ, carrot, chamomile, grape seeds) and avocado oil. It also contains UVA/UVB filters and natural vitamin E (wheat germ and carrot extracts) that protect the skin against premature ageing related to solar radiation.

The cream has a nourishing and rejuvenating effects, preventing free radicals' formation and restoring skin's hydrolipidic balance.

After application, it quickly absorbs, without leaving greasy feeling.

Composition: *Olea europaea* fruit oil, *Helianthus annuus* seed oil, *Triticum vulgare* germ extract, *Echinacea purpurea* flower extract, *Vitis vinifera* seed extract, cholesterol, *Persea gratissima* oil, *Daucus carota sativa* root extract, vitamin E, *Plantago lanceolata* leaf extract, *Chamomilla recutita* flower extract, *Symphytum officinale* root extract, excipients.

Use: apply the cream on clean face and neckline twice a day (both in the morning and in the evening).

Packaging: 50 ml jar

Hair care

Hair conditioner

Description: Caresses dull hair, restoring its suppleness, volume and glow; it also facilitates hair styling.

The combination of D-panthenol and natural herbal extracts has moisturizing and emollient properties.

Composition: *Tagetes erecta* flower extract, *Olea europaea* fruit oil, *Arctium lappa* root extract, *Humulus lupulus* cone extract, *Hedera helix* leaf extract, *Arnica montana* flower extract, panthenol, excipients.

Use: apply after wash to wet hair and gentle massage; wait for about 5-10 minutes (for optimal hair contact), then rinse with plenty of warm water.

Packaging: 150 ml tube

Hair mask

Description: Takes care of dry and damaged hair, restoring its natural glow. The bioactive complex and D-panthenol promotes hair hydration and regeneration, preventing aging and damage. After using it, the hair becomes smooth, silky and easier to style.

Composition: *Triticum vulgare* germ extract, *Humulus lupulus* cone extract, *Urtica dioica* extract, panthenol, keratin, *Persea gratissima* oil, excipients.

Use: apply after wash to wet hair; wait for about 5-10 minutes (for optimal hair contact), then rinse with plenty of warm water.

Packaging: 150 ml tube

Hair lotion

Description: Prevents hair loss, stimulates scalp microcirculation and promotes efficient hair nourishing. Favours nutrient absorption and accelerates hair growth.

Composition: *Melissa officinalis* leaf extract, *Salvia officinalis* extract, *Trifolium pratense* extract, *Medicago sativa* extract, *Humulus lupulus* cone extract, *Lavandula angustifolia* flower extract, *Vitis vinifera* seed extract, *Triticum vulgare* germ extract, *Ricinus communis* seed oil, quinine, excipients.

Use: apply daily on the scalp (preferably in the evening) and massage intensively. The product does not make hair greasy. After use, it is not necessary to wash the hair. To be used for a maximum of 30 days. Avoid contact with the eyes.

Packaging: 110 ml spray

Cream shampoo

Description: NutriTIS Cream Shampoo with castor oil has a creamy texture and nourishing properties.

Castor oil prevents hair loss and stimulates its rejuvenation. Bioactive compounds from *herbal extracts* stimulate skin metabolism, enhancing the hair loss prevention effect.

Suitable for all hair types!

Composition: *Triticum vulgare* germ extract, *Humulus lupulus* cone extract, *Ricinus communis* seed oil, *Betula alba* leaf extract, panthenol, excipients.

Use: apply to wet hair, under a 2-3 minute gentle massage; then rinse with plenty of warm water.

Packaging: 250 ml bottle

Hair care

CafeinTIS Shampoo for dull, damaged hair care

Description: It fights against hair loss and has a pleasant, creamy texture. **Caffeine** prevents hair loss, stimulates hair growth and strengthens hair root. **D-panthenol** and bioactive compounds from **herbal extracts** have moisturizing and nourishing properties.

Composition: *Triticum vulgare* germ extract, *Betula alba* bark extract, caffeine, *Vitis vinifera* leaf extract, *Aesculus hippocastanum* bark extract, panthenol, excipients.

Use: apply to wet hair under gentle massage, then rinse with plenty of warm water.

Packaging: 250 ml bottle

Burdok & Nettle shampoo

Description: Burdock & Nettle Shampoo efficiently cleanses hair and scalp, restoring the natural shine and facilitating hairstyling. The combination of **herbal extracts** (*Plantago lanceolata* leaf extract, *Arctium lappa* root extract, *Urtica dioica* extract, *Aloe barbadensis* leaf extract), **D-panthenol** and **keratin** gives the shampoo moisturizing and nourishing properties. The shampoo fights against excessive sebaceous secretions, thus preventing dandruff formation.

After using it, the hair becomes brighter, more resistant, regaining its elasticity and natural freshness.

Composition: *Plantago lanceolata* leaf extract, *Arctium lappa* root extract, *Urtica dioica* extract, *Aloe barbadensis* leaf extract, keratin, salicylic acid, panthenol, excipients.

Use: apply to wet hair under gentle massage; wait for about 2-3 minutes (for optimal hair contact), then rinse with plenty of warm water.

Packaging: 250 ml bottle

Propolis shampoo

Description: **Propolis Shampoo** can be used to prevent and eliminate dandruff, due to the three essential properties: keratolytic, antibacterial and anti-inflammatory.

Recommendation: This shampoo is recommended to prevent and eliminate dandruff, without affecting the hair's physiological properties, elasticity and natural shine.

Composition: Propolis extract, *Betula alba* leaf extract, *Plantago lanceolata* leaf extract, *Achillea millefolium* extract, climbazole, salicylic acid, excipients.

Use: apply to wet hair, wait for about 5 minutes (for optimal hair contact), then rinse with plenty of warm water; the shampoo can be applied twice a week.

Packaging: 250 ml bottle

Oily hair shampoo

Description: This shampoo effectively moisturizes the scalp and activates hair root micro-circulation, restoring the hair's natural appearance. It fights against hair loss, related to excessive seborrheic secretion, caused by genetic factors, pollution, or abusive drug treatments.

Natural extracts with keratolytic and astringent properties, maintain seborrheic secretion balance, and at the same time, D-panthenol and keratin rejuvenate the damaged hair. The formula base has mild washing properties and does not irritate the scalp. It reduces hair washing frequency!

Composition: *Quercus robur* bark extract, *Plantago lanceolata* leaf extract, salicylic acid, hydrolyzed keratin, resorcinol, *Urtica dioica* extract, *Salvia officinalis* extract, *Achillea millefolium* extract, panthenol, allantoin, excipients.

Use: apply to wet hair, under gentle massage, wait for about 5 minutes (for optimal hair contact), then rinse with plenty of warm water.

Packaging: 250 ml bottle

Hair care

Mallow & nettle shampoo

Description: **Mallow & Nettle Shampoo** has revitalizing, rejuvenating and strengthening properties over the hair root. It restores the hair's natural elasticity and suppleness, reaching its best moisture level.

The hair gets volume and becomes easier to style.

Composition: *Betula alba* leaf extract, *Urtica dioica* extract, *Malva sylvestris* extract, salicylic acid, panthenol, excipients.

Use: apply to wet hair, under gentle massage; wait for about 2-3 minutes (for optimal hair contact), then rinse with plenty of warm water.

Packaging: 250 ml bottle

Revitalising shampoo

Description: The *Revitalizing Shampoo* stimulates and regenerates the hair root; it promotes long-term hydration and prevents hair damage. This shampoo is specially formulated for all hair types. It contains natural **chestnut bark extract**, which stimulates micro-circulation and **wheat germ extract** with nourishing properties. The washing base formula contains gentle surfactants, which allow daily usage. It moisturizes the hair and prevents it from damage.

Suitable for all hair types!

Composition: *Humulus lupulus* extract, *Avena sativa* kernel extract, *Aesculus hippocastanum* bark extract, *Triticum vulgare* germ extract, Pollen extract, panthenol, allantoin, excipients.

Use: apply to wet hair, under gentle massage; wait for about 3-5 minutes (for optimal hair contact), then rinse with plenty of warm water.

Packaging: 250 ml bottle

Oily skin cream

Description: The cream normalizes sebum secretions, minimizes enlarged pores and "covers up" the unpleasant traces related to excessive sebum. It contains vitamin A and herbal ingredients with antiseptic, astringent, moisturizing and nourishing properties, suitable for correcting skin imperfections and acne care. After using this cream, the oily skin becomes matte and the area exposed to environmental aggression (wind, cold, heat, moisture) is moisturized and protected. It has a light, non-greasy texture, specially designed for optimal absorption. No greasy or sticky feeling after use!

Composition: *Lavandula angustifolia* flower extract, *Salvia officinalis* extract, *Butyrospermum parkii* (shea) butter, *Persea gratissima* oil, *Symphytum officinale* leaf extract, *Plantago lanceolata* leaf extract, allantoin, *Daucus carota sativa* root extract, vitamin E, *Chamomilla recutita* flower extract, *Achillea millefolium* extract, bentonite, vitamin A, *Lavandula angustifolia* oil, excipients.

Use: apply after a prior cleansing of the face; spread in a thin layer with ascending circular movements. Use anytime needed.

Packaging: 50 ml jar

Mattifying face cream

Description: The cream gives a uniform, matte and silky appearance to all skin types. With a light, non-greasy texture, it contains natural extracts with a moisturizing and soothing effect (*Achillea millefolium* extract, *Vitis vinifera* leaf extract, *Avena sativa* kernel extract, *Glycyrrhiza glabra* root extract).

The bioactive complex consisting of niacinamide, zinc gluconate, bentonite, *Salvia officinalis* extract and *Inula helenium* extract has a purifying role and regulates the amount of sebum, without disturbing the sweat glands. Used daily, the mattifying cream evens out the appearance of the skin, provides firmness and tone, thus being a perfect make-up base. SPF: 10

Composition: squalane, *Achillea millefolium* extract, *Salvia officinalis* extract, *Glycyrrhiza glabra* root extract, *Butyrospermum parkii* butter (shea butter), *Avena sativa* kernel extract, *Vitis vinifera* leaf extract, zinc gluconate, *Inula helenium* extract, titanium dioxide, niacinamide, bentonite, vitamin A, excipients.

Use: apply in a thin layer on clean skin, and massage gently, with upward circular movements, in the morning and evening.

Packaging: 50 ml jar

Sensitive skin care

Eye contour gel

Description: It alleviates fatigue marks and dark circles; soothes the sensitive skin around eyes, which becomes firm and supple after use.

Composition: *Vaccinium myrtillus* fruit extract, *Centaurea cyanus* flower extract, *Vaccinium myrtillus* leaf extract, *Plantago lanceolata* leaf extract, sodium hyaluronate, excipients.

Use: apply on the skin around the eyes, in a thin layer, twice a day (in the morning and in the evening), under gentle massage.

Packaging: 20 ml tube

Dark spot removal face lotion

Description: Fades out the existing brown (hyperpigmentation) spots and prevents the formation of new ones, in a skin-friendly manner.

Herbal complex (*Aloe barbadensis* leaf extract, *Glycyrrhiza glabra* root extract, *Vaccinium vitis-idaea* leaf extract, *Achillea millefolium* extract and *Vitis vinifera* leaf extract) enhances vitamin C whitening effect.

Parabens and synthetic perfume free!

Composition: *Aloe barbadensis* leaf extract, *Glycyrrhiza glabra* root extract, *Vaccinium vitis-idaea* leaf extract, *Achillea millefolium* extract, *Vitis vinifera* leaf extract, vitamin C, excipients.

Use: local applications, whenever needed. After using the product avoid sun exposure for at least 2 hours.

Packaging: 50 ml spray bottle

Lip care

Nourishing lip balm

Description: This balm restores lip natural glow, emphasizing face expression; it moisturizes, softens and protects the lips against harmful factors (sun, wind, cold).

Composition: *Theobroma cacao* seed butter, *Ricinus communis* seed oil, *Vitis vinifera* seed extract, *Daucus carota sativa* root extract, *Butyrospermum parkii* butter (shea butter), *Aloe barbadensis* leaf extract, *Copernicia cerifera* cera, squalene, *Calendula officinalis* flower extract, vitamin A, excipients.

Use: apply with clean fingertips a thin, even coating on the lips, when needed.

Packaging: 6 g jar

Calendula face cream

Description: The product is recommended for sensitive skin care; it can also be used as make-up base. It has a light, hydrophilic texture. Extracts are rich in natural phytosterols (*Trifolium pratense* extract, *Medicago sativa* extract) and carotenes (*Calendula officinalis* flower extract and *Hippophae rhamnoides* fruit extract), ensure deep and lasting hydration. In addition, *Calendula* extract has anti-inflammatory properties, stimulates epithelization and scarring, reduces the imperfections of the epidermis, allowing it to regain its uniform appearance.

Composition: *Calendula officinalis* flower extract, *Trifolium pratense* extract, *Medicago sativa* extract, squalene, *Hippophae rhamnoides* fruit extract, excipients.

Use: apply in a thin layer on clean skin, twice a day (both in the morning and in the evening).

Packaging: 50 ml jar

Foot care

Heel cream

Description: Emollient cream, suitable for heel and elbow care, due to its nourishing and healing properties. Ideal for preventing and treating cracks and scales that may occur in the heel and elbow skin areas.

The combination of oil- soluble *Hippophae rhamnoides* fruit extract and *Plantago lanceolata* leaf extract prevents skin's cells drying out and exfoliation and restores tonicity and suppleness.

Hippophae rhamnoides fruit extract (rich in carotenes – natural provitamin A) has trophic action on the tissues and regenerates the skin.

Plantago lanceolata leaf extract (rich in iridoids) accelerates the natural scarring and epithelization processes.

Composition: *Helianthus annuus* seed oil, *Plantago lanceolata* leaf extract, *Calendula officinalis* flower extract, *Hippophae rhamnoides* fruit extract, *Triticum vulgare* germ extract, *Daucus carota sativa* root extract, vitamin E, excipients.

Use: apply the cream in a thin layer and gently massage the affected area.

Packaging: 50 ml tube

Castor oil with vitamin A

Description: A product enriched in vitamin A, with rejuvenating, nourishing and emollient properties on dry skin, thin and exfoliated nails, as well as on devitalized, dull hair.

Thanks to the carotenoids (especially beta carotene) from its composition, the carrot oil-soluble extract enhances the effect of the product, promoting antioxidant properties.

Composition: *Ricinus communis* seed oil, *Daucus carota sativa* root extract, *Tagetes erecta* flower extract, vitamin A, excipients.

Use:

skin care: apply a few drops and massage gently until the product is completely absorbed

nail care: apply a drop on each nail and wait for at least 15 minutes to reach optimal contact

hair care: apply an amount of product, enough to ensure penetration to hair root and spread it over the entire hair length; gently massage, wait for at least 15 minutes and wash the hair normally.

Packaging: 100 ml bottle

Moisturizing mask

Description: Moisturising and refreshing mask, optimal for normal and seborrheic skin care and cleansing, due to the adsorbent bentonite clay from its composition. Deep purifying mask which revives and smoothes the skin; after usage, the skin becomes clean and bright. It has a soft texture (easily spreads), being easily absorbed after application. Constant use makes the skin regains its elasticity. The active principles from herbal extracts (*Lavandula angustifolia* flower extract, *Melissa officinalis* leaf extract, *Salvia officinalis* extract), have astringent effect, activate microcirculation, efficiently rejuvenates skin and contribute to pore closing. The natural oil-soluble extracts (*Persea gratissima* oil, *Daucus carota sativa* root extract, *Vitis vinifera* seed extract), natural pollen proteins and vitamin E perform cellular revitalization and nourishing.

Composition: *Vitis vinifera* seed extract, *Lavandula angustifolia* flower extract, *Melissa officinalis* leaf extract, cholesterol, bentonite, Pollen extract, *Daucus carota sativa* root extract, *Persea gratissima* oil, *Salvia officinalis* extract, *Aloe barbadensis* leaf extract, *Chamomilla recutita* flower extract, vitamin E, *Lavandula angustifolia* oil, excipients.

Use: apply the mask on precleaned skin. Due to its light texture, it can be applied without afterwards removal (total absorption), or it can be left on the skin for at least 15 minutes, and then removed by simple water washing.

Packaging: 50 ml tube

TISderm Face cleansing lotion

Description: Removes impurities and blackheads; moisturizes and protects the skin.

TIS DERM Face cleansing lotion contains oil drops (olive oil and squalene) finely dispersed with cleaning agents in water, forming micelles that ensure a delicate cleaning. It has a composition rich in hyaluronic acid and plant extracts.

Composition: *Aloe barbadensis* leaf extract, *Articum lappa* root extract, *Chamomilla recutita* flower extract, *Melissa officinalis* leaf extract, *Olea europaea* fruit oil, sodium hyaluronate, excipients.

Use: Apply to the face, using a cleansing pad. Massage gently in circular movements, until the lotion starts to foam. Rinse face with plenty of water. Avoid eye contact!

Packaging: 250 ml bottle

Nourishing eye cream

Description: It intensively moisturizes the sensitive skin around the eyes; it stimulates cell restoration processes and nourishes dermal tissue, preventing the occurrence of premature ageing.

Composition: *Vitis vinifera* seed extract, *Achillea millefolium* extract, *Vitis vinifera* leaf extract, *Persea gratissima* oil, *Centaurea cyanus* flower extract, *Vaccinium myrtillus* leaf extract, *Chamomilla recutita* flower extract, *Daucus carota sativa* root extract, vitamin E, sodium hyaluronate, *Theobroma cacao* seed butter, excipients.

Use: apply on the skin around eyes, in a thin layer, under gentle massage.

Packaging: 20 ml tube

Cleansing milk

Description: Thanks to the Composition from propolis and bees honey, the Cleansing milk effectively removes makeup and impurities from the skin's surface, protecting it against harmful factors and ensuring optimal hydration level. After use, it induces a pleasant feeling of softness and firmness.

The propolis extract is rich in polyphenolic acids (caffeic acid), flavonoids and, even, essential fatty acids, has antibacterial and emollient action, cleans and hydrates the skin.

Bees honey contains vitamins, minerals, amino acids and microelements in varying amounts, with tonic, depurative and nourishing effect.

Oil-soluble herbal extracts (lavender, chamomile, wheat germ), with emollient nourishing, antiseptic and anti-inflammatory effect, induce the product anti-allergic properties.

Composition: *Chamomilla recutita* flower extract, mel, *Triticum vulgare* germ extract, Propolis extract, *Salvia officinalis* extract, *Lavandula angustifolia* flower extract, excipients.

Use: apply to the face with a makeup remover disk.

Packaging: 100 ml tube

Moisturizing face cream with Aloe vera and hyaluronic acid

Description: Moisturizing cream specially formulated to maintain skin tonus and optimal hydration level, throughout the day.

The cream formulation contains an efficient combination of hyaluronic acid, aloe vera and oil-soluble extracts with moisturizing, soothing and rejuvenating properties.

The *Aloe barbadensis* leaf extract moisturizes the skin and protects it against irritation and premature ageing; it instantly penetrates the skin and induces a pleasant refreshing feel.

Hyaluronic acid, present in the skin composition, contributes to natural tissue regeneration process.

Oil-soluble herbal extracts contain liposoluble vitamins and essential fatty acids, with emollient properties, maintaining skin optimal hydration level.

Suitable for all skin types!

Composition: *Aloe barbadensis* leaf extract, cholesterol, *Hippophae rhamnoides* fruit extract, *Glycyrrhiza glabra* root extract, *Chamomilla recutita* flower extract, squalane, *Triticum vulgare* germ extract, *Calendula officinalis* flower extract, *Vitis vinifera* leaf extract, *Hedera helix* leaf extract, sodium hyaluronate, excipients.

Use: apply in a thin layer, on previously cleansed skin.

Packaging: 50 ml jar

Micellar water

Description: Cleanses, hydrates and tones the skin. It removes make-up products from the surface of the epidermis, hydrates and ensures the skin's suppleness is maintained.

Composition: *Olea europaea* fruit oil, excipients.

Use: apply to the face with a make-up remover pad. Clean the skin with circular movements, massaging gently.

Packaging: 300 ml bottle

Nourishing night cream

Description: The cream is enriched in natural fats and herbal ingredients and has strong moisturizing properties.

This night cream is easily absorbed through the skin, providing an efficient nourishing effect; it can also be used during daytime, due to active against harmful UV radiation ingredients.

The combination of vitamins (A & E) and herbal extracts provides deep, long-lasting hydration and stimulates collagen and elastin restoration. Thanks to triterpene flavonoids (ursolic acid, chlorogenic acid), the cream enhances skin cellular functions, stimulating cholesterol and elastin synthesis – natural compounds that restore the firmness and elasticity of aged and dry skin.

Composition: *Vitis vinifera* seed extract, *Butyrospermum parkii* butter, *Persea gratissima* oil, *Symphytum officinale* leaf extract, mel, *Chamomilla recutita* flower extract, *Calendula officinalis* flower extract, *Echinacea purpurea* extract, *Triticum vulgare* germ extract, *Achillea millefolium* extract, *Daucus carota sativa* root extract, *Urtica dioica* extract, *Theobroma cacao* seed butter, vitamin A, vitamin E, excipients.

Use: apply daily, in the evening, on cleaned skin; it is especially recommended for dry or normal skin types.

Packaging: 50 ml jar

Moisturizing face cream with vitamins, chamomile and hyaluronic acid

Description: Moisturizing cream with hyaluronic acid, vitamins (A, E) and natural chamomile extract for daily skin care.

The light texture facilitates the product application; thus, it can be used for all skin types, both day and night.

The chamomile extract has protective action due to its antimicrobial and soothing properties.

Hyaluronic acid, present in the skin composition, contributes to natural tissue regeneration process.

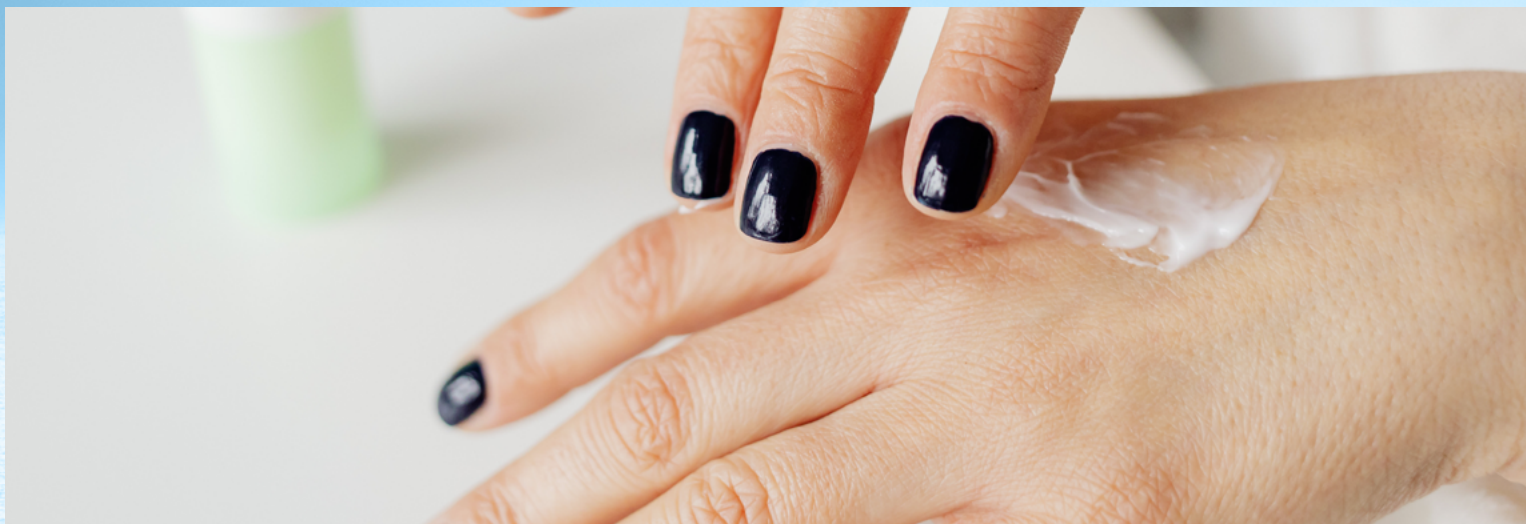

Vitamins A & E (antioxidant and anti-inflammatory compounds from *Hippophae rhamnoides* fruit extract and *Chamomilla recutita* flower extract), as well as the active compounds from *Hedera helix* leaf extract, prevent premature skin ageing and restore its natural qualities (tonus, elasticity, firmness).

Composition: *Chamomilla recutita* flower extract, cholesterol, *Vitis vinifera* leaf extract, squalane, *Hippophae rhamnoides* fruit extract, *Hedera helix* leaf extract, vitamin E, *Daucus carota sativa* root extract, vitamin A, sodium hyaluronate, excipients.

Use: apply daily on clean skin and massage gently.

Packaging: 50 ml jar

Lip care

Aloe vera lipstick

Description: Moisturizing, emollient and protective; recommended for dry and cracked lips, affected by harmful agents (UV, excessive heat/cold, wind).

Thanks to the natural extracts the product has a strong moisturizing and tonic effect. After application it leaves a pleasant herbal odour and a slightly sweet taste (due to *Glycyrrhiza glabra* root extract). Colorant and synthetic preservative free!

Composition: *Theobroma cacao* seed butter, *Ricinus communis* seed oil, *Vitis vinifera* seed extract, *Copernicia cerifera* cera, *Aloe barbadensis* leaf extract, *Butyrospermum parkii* butter (shea butter), *Vitis vinifera* leaf extract, *Vaccinium vitis-idaea* leaf extract, *Glycyrrhiza glabra* root extract, titanium dioxide, excipients.

Use: local application.

Packaging: 4 g lipstick case

Echinacea lipstick

Description: Moisturizing, emollient and protective; recommended for dry and cracked lips, affected by harmful agents (UV, excessive heat/cold, wind).

Echinacea extract stimulates the regeneration of damaged tissues; it promotes wound healing and has a mild antiseptic effect. The formula base consists of oil-soluble herbal extracts (grape seeds, carrot) and natural excipients (cocoa butter, castor oil, beeswax), suitable for lip care.

After application it leaves a pleasant herbal odour (due to echinacea extract) and a slightly sweet taste (due to *Glycyrrhiza glabra* root extract). Colorant and synthetic preservative free!

Composition: *Theobroma cacao* seed butter, *Ricinus communis* seed oil, *Vitis vinifera* seed extract, *Copernicia cerifera* cera, *Echinacea purpurea* extract, *Butyrospermum parkii* butter (shea butter), *Hippophae rhamnoides* fruit extract, *Glycyrrhiza glabra* root extract, vitamin E, excipients.

Use: local application.

Packaging: 4 g lipstick case

Fruit flavoured lipstick

Description: Moisturizing, emollient and protective; recommended for dry and cracked lips, affected by harmful agents (UV, excessive heat/cold, wind).

Natural cranberry, blueberry and licorice extracts have antioxidant, emollient and astringent properties.

After application it leaves a pleasant fruity odour and a slightly sweet taste (due to *Glycyrrhiza glabra* root extract). Colorant and synthetic preservative free!

Composition: *Theobroma cacao* seed butter, *Ricinus communis* seed oil, *Vitis vinifera* seed extract, *Copernicia cerifera* cera, *Butyrospermum parkii* butter (shea butter), *Glycyrrhiza glabra* root extract, *Vaccinium myrtillus* fruit extract, *Vaccinium vitis-idaea* leaf extract, titanium dioxide, excipients.

Use: local application.

Packaging: 4 g lipstick case

Propolis lipstick

Description: Moisturizing, emollient and protective; recommended for dry and cracked lips, affected by harmful agents (UV, excessive heat/cold, wind). Bioactive compounds from propolis extract have antimicrobial and astringent effect.

Oil-soluble natural extracts increase the soothing and regenerating effect. After application it leaves a pleasant balsamic odour (due to propolis extract) and a slightly sweet taste.

Colorant and synthetic preservative free!

Composition: *Theobroma cacao* seed butter, *Ricinus communis* seed oil, *Vitis vinifera* seed extract, *Copernicia cerifera* cera, *Butyrospermum parkii* butter (shea butter), propolis extract, excipients.

Use: local application.

Packaging: 4 g lipstick case

Sunscreens

Protective lipstick

Description: Protective lipstick, containing titanium dioxide, recommended for lip care and protection against environmental factors, especially UV radiation. This lipstick formulation combines a base consisting of natural bees wax and other synthetic waxes, with a suitable composition for lip protection against harmful factors. SPF: 15

Composition: *Theobroma cacao* seed butter, *Copernicia cerifera* cera, *Ricinus communis* seed oil, *Butyrospermum parkii* butter (shea butter), *Hippophae rhamnoides* fruit extract, *Vitis vinifera* seed extract, benzophenone-3, titanium dioxide, excipients.

Use: local application.

Packaging: 4 g lipstick case

Carrot oil

Description: Protects the skin against UV radiation and free radicals.

It can be used as such, or in combination with other vegetable oils, due to its emollient and moisturizing properties; provides the optimal hydration level for skin stratum corneum. Prepares the skin prior to sun exposure, to obtain uniform tanning.

Softens and refreshes the skin after sun exposure, promoting skin cells rejuvenation, good antioxidant agent.

Composition: *Helianthus annuus* seed oil, *Daucus carota sativa* root extract (carrot oil-soluble extract).

Use: local applications when needed.

Packaging: 50 ml spray bottle

Footcare

CLAVOS, keratolytic cream

Description: Keratolytic cream recommended for painful calluses removal. It slows down the skin thickening process, which occurs in the epidermis deep layers. It removes the dead cells (from callus) by dissolution. The greasy base, consisting of natural, skin compatible excipients, eases the product application, does not affect the skin around the callus and promotes the scarring process. The cream can be easily removed by hot water washing.

Composition: salicylic acid, excipients.

Use: apply the cream using a cotton bud stick, directly on the callus (protect the healthy skin around the callus by prior applying a greasy cream); repeat the application until the callus is totally removed.

Packaging: 4 g jar

CLAVOS, keratolytic solution

Description: Keratolytic solution that removes corns and calluses from hands and feet surface (fingers or foot soles). It slows down the skin thickening process, which occurs in the epidermis deep layers and is accompanied by pain. It removes the dead cells (from callus) by dissolution.

Composition: salicylic acid, excipients.

Use: apply the solution using a cotton bud stick, directly on the callus (healthy skin around the callus can be protected by prior applying a greasy cream); let it dry until the callus becomes covered with a sticky film (a patch can be applied); the next day remove the solution film that covers the callus and repeat the application, until the callus is totally removed.

Packaging: 10 ml vial

Body care

Depilatory wax

Description: Ideal for unwanted hair removal. After repeated use, hair becomes thinner and depilation is done easier and rarer.

Composition: beeswax, propolis extract.

Use: Please carefully read the following steps:

1. Melt the wax at medium heat, stirring until it becomes completely liquid.
2. Let it cool down to around 40-50°C; always test the temperature of the wax by applying a small amount to the inside of your wrist. It should be warm, but not hurt or burn.
3. With the help of a spatula, apply the wax to a small section of your skin with unwanted hair. For the best results, always spread the wax in the direction of hair growth (on legs from top to bottom).
4. Let the strip cool down for a few minutes. To remove, hold your skin taut with one hand and use your other hand to quickly pull off the strip in the opposite direction of hair growth (from bottom to top).
5. It is advisable not to apply more than 2-6 strips before the first strip is removed.
6. After waxing, the remaining product on your skin can be removed by massaging the place with a tampon soaked in medicinal alcohol solution.

Packaging: 150 g box

Wheat germ oil

Description: Vitamin E stimulates collagen synthesis and rejuvenates dry skin, delaying the ageing processes.

Composition: *Helianthus annuus* seed oil, *Triticum vulgare* extract (wheat germ oil-soluble extract).

Use: local applications when needed.

Packaging: 50 ml bottle

Skin cleaning and protecting products

Intimate gel

Description: Lubricating gel for intimate or medical use.

Recommendations:

for intimate

Use: vaginal mucosa lubricant (during breastfeed period, menopause, hormone, or chemotherapy)

for medical

Use: it facilitates introduction of medical devices inside the cervix (e.g thermometers, cannulas, endoscopes)

It has a good spreading capacity and is well tolerated. It is compatible with mucous membranes, non-greasy and easy to remove with water.

Composition: *Plantago lanceolata* leaf extract, *Calendula officinalis* flower extract, *Salix alba* bark extract, excipients.

Use: apply in the vaginal cavity and/or on the perineum, using the provided applicator.

Packaging: 50 ml tube

GINOTISOL, propolis gel

Description: It is a propolis gel specially formulated for intimate mucosa and skin care.

It can be used:

daily care of dry intimate mucosa and tissue (has moisturizing and lubricating properties)

by women of all ages who suffer from intimate inflammation or infections (it restores and maintains intimate comfort; contributes to maintaining proper intimate hygiene)

Composition: propolis extract, excipients.

Use: apply twice a day on the intimate affected area, after performing local hygiene.

Packaging: 40 ml tube

Oily & acne-prone skin care

TISALIBOUR, stick

Description: Antibacterial, anti-inflammatory and moisturizing stick, recommended for minor skin irritations care.

The formulation's efficiency is based on the combination of Composition from *Plantago lanceolata* leaf extract and *Achillea millefolium* extract, zinc & copper sulphates and zinc oxide. The product cleans and protects recurrent and diffuse irritations that may occur in sensitive, acne-prone skin; alleviates the scars related to infectious skin conditions (pimples, acne).

Composition: *Ricinus communis* seed oil, *Copernicia cerifera* cera, *Plantago lanceolata* leaf extract, *Vitis vinifera* seed extract, *Achillea millefolium* extract, zinc oxide, copper sulphate, zinc sulphate, salicylic acid, excipients.

Use: local application.

Packaging: 4 g lipstick case

Sage & Propolis gel

Description: Sage and Propolis gel has antibacterial, anti-inflammatory, slightly anaesthetic and astringent effect, due to the combination of propolis and sage extracts.

Thanks to its calming, anti-inflammatory, anaesthetic action, it is recommended before and after oral cavity surgery, to sustain the oral mucosa rejuvenation. It prevents mouth infections in the case of fixed or mobile dental prostheses.

Propolis extract has calming and healing properties; it stimulates the regeneration of the oral mucosa affected by aphthae or local irritations.

Composition: propolis extract, glycerin, *Salvia officinalis* extract, excipients.

Use: local applications in a thin layer, gentle massaging the affected area.

Packaging: 20 ml tube

0,2% Chlorhexidine gel

Description: The gel covers the oral mucosa with a protective, bacteriostatic layer.

Properties:

- it promotes oral mucosa rejuvenation after surgery
- it eliminates the discomfort related to oral mucosa dryness
- it prevents gingivitis and stomatitis caused by dental prostheses

Composition: glycerin, Plantago lanceolata leaf extract, Chamomilla recutita flower extract, chlorhexidine digluconate, excipients.

Use: apply to the affected area. After application, for 30 minutes, brushing or eating food is not recommended.

Packaging: 50 ml tube

Geum urbanum gums gel

Description: It prevents the gums retraction and has an astringent action due to *Geum urbanum* extract (rich in eugenol) and propolis extract.

The association between *Inula helenium* extract (contains active principles with antibiotic action), *Geum urbanum* extract and propolis gives the product antimicrobial properties. The oil-soluble *Hippophae rhamnoides* fruit extract has a regenerating effect on the affected gums.

Indications:

inflammatory stages of oral cavity afflictions (gingivitis, bleeding or post-surgical conditions, gingival retraction, gingival pockets) after scaling process or tooth extractions

to people wearing removable prostheses, dental appliances

Composition: Propolis extract, *Geum urbanum* extract, glycerin, *Inula helenium* extract, *Hippophae rhamnoides* fruit extract, excipients.

Use: apply the gel directly to the affected area (gum) after oral hygiene. Avoid eating and drinking for 30 minutes after using the gel. It can be used 3-5 times/day until the symptoms disappear.

Packaging: 50 ml tube

BiodenTIS toothpaste

Description: Essential oils and clay-based toothpaste, with pleasant taste and refreshing effect.

Properties:

- it contains essential oils and clay
- it has a superior cleansing action through complex absorption-adsorption mechanisms, which promote acids neutralization, especially after meals
- it reduces and prevents tooth enamel micro-fissures and enhances the quality of the oral cavity environment
- it prevents plaque and gingival retraction
- it has a pleasant taste and refreshing effect
- it does not contain preservatives, artificial sweeteners, colouring and foaming agents

Composition: clay, sea salt, *Salvia officinalis* oil, *Mentha piperita* oil, *Cinnamomum cassia* leaf oil, excipients.

Use: brush your teeth and gums 2-3 times a day.

Packaging: 50 ml (65 g) tube

Propolis and herbal extracts mouth wash

Description: The product contains propolis and herbal extracts with disinfectant, deodorant and local anaesthetic properties.

When reaching the oral cavity glands, it promotes a pleasant feel, inhibiting the undesired odour and stimulating salivation.

It is a concentrated solution; thus it has to be diluted before usage.

It is recommended:

- for daily oral hygiene
- in the local treatment of mouth infections and inflammations (stomatitis, glossitis, gingivitis)
- to reduce dentin hypersensitivity
- as a breath refresher

Composition: alcohol, Propolis extract, *Salvia officinalis* extract, Chamomilla recutita flower extract, Juniperus communis fruit extract, Geum urbanum extract, Populus nigra bud extract, zinc chloride, excipients.

Use: before using the product prepare a solution of 10-20 drops in half a glass of water; rinse the oral cavity with the solution thus prepared.

Packaging: 20 ml vial

TISODENT 0,2% CHLORHEXIDINE, mouth wash

Description: Recommended for the daily oral hygiene or as an adjuvant in bacterial flora-related disorders of oral and oropharyngeal cavities.

It prevents plaque and cavities formation. Due to the sage extract, it has a tonic and astringent effect. Thus, it can be used after oral cavity surgery.

Composition: 0,2% chlorhexidine digluconate, *Salvia officinalis* extract, *Mentha piperita* oil, excipients.

Use: Apply the product as oral douche, 2-3 times a day, for 8-10 weeks. 30 minutes after use, avoid brushing or eating.

Packaging: 1000 ml bottle

TISODENT 0,1% CHLORHEXIDINE, mouth wash

Description: Recommended for the daily oral hygiene or as an adjuvant in bacterial flora-related disorders of oral and oropharyngeal cavities. It prevents plaque and cavities formation. It can also be used after oral cavity surgery.

Composition: 0,1% chlorhexidine digluconate, *Salvia officinalis* extract, *Mentha piperita* oil, excipients.

Use: Apply the product as oral douche, 2-3 times a day, for 8-10 weeks. 30 minutes after use, avoid brushing or eating.

Packaging: 150 ml bottle

Propolis & Calendula infused glycerin

Description: The product has a bacteriostatic, fungistatic and anti-inflammatory effect, due to the combination of propolis and calendula extracts.

It can be used as:

- an antiseptic for the oral cavity
- an adjuvant treatment in different types of oral mucosa inflammation (e.g. aphthae, glossitis, stomatitis, gingivitis) and in *Candida albicans* infections

Shake well before use! Do not swallow!

Composition: propolis extract, *Calendula officinalis* flower extract, excipients.

Use: apply directly to the affected area (gum) after oral hygiene. Avoid eating and drinking for at least 30 minutes after usage.

Packaging: 25 ml vial

SaniTIS protect – Disinfectant solution for hands and surfaces

Description: This is an authorized biocidal product. Field of Use: hygienic disinfection of hands and surfaces.

Composition: ethanol, chlorhexidine digluconate, excipients.

Use: After applying enough product, rub your hands until complete evaporation. Apply only to intact skin. Wipe the surfaces with a cloth or towel.

Cautions: Keep away from heat sources/ sparks/ open flames/ hot surfaces. The product is designed for external use only. Do not swallow. Avoid contact with eyes. In case of accidental contact, wash with plenty of water. Do not use on damaged or mucous membranes. Do not mix or apply together with other disinfectants. Keep out of reach of children. Do not use after the expiry date written on the packaging. Store at temperatures below 25°C, in original packaging. Contraindicated to people with hypersensitivity to one of the product components.

Packaging: 1000 ml container (left); 110 ml spray bottle (right)

Syrup with *Albies alba* bud extract

Albies alba bud extract has a complex composition which gives the product a pleasant and strong flavour, making breathing easier.

Composition: *Albies alba* bud extract 3% and excipients.

Properties:

Albies alba bud extract contains volatile oils, flavonoids and phenolic compounds, resinous substances, vitamins, with synergetic action, limiting the local obstruction of the upper respiratory tract.

The syrup stimulates the body's defense capacity in cold periods, being used as a complementary treatment for the upper respiratory tract.

Use:

Adults: 1 tablespoon 3-4 times a day.
Children over 1 year: 1 teaspoon 3-4 times a day.

Packaging: 150 ml bottle

Syrup with *Plantago lanceolata* leaf extract

The syrup soothes the irritated mucous membrane of the pharynx and the vocal cords and has an antitussive effect.

Composition: *Plantago lanceolata* leaf extract 10% and excipients.

Properties:

Plantago lanceolata leaf extract has emollient, lubricating and soothing properties for the irritated upper respiratory tract. The syrup improves respiratory comfort.

Use:

Adults: 1 tablespoon 3-4 times a day.
Children over 1 year: 1 teaspoon 3-4 times a day.

Packaging: 150 ml bottle

Syrup with *Pinus sylvestris* bud extract

TISOFIT-Syrup with *Pinus sylvestris* extract improves the respiratory function and favors the elimination of toxins by protecting the urinary tract and is recognized as a body detoxifier, helping to improve kidney function.

Composition: *Pinus sylvestris* bud extract 3% and excipients.

Properties: *Pinus sylvestris* extract contains volatile oils specific to conifers (with antiseptic and decongestant properties), flavonoids and phenolic compounds. These bioactive compounds with synergetic action have antiseptic, decongestant, expectorant and detoxifying properties.

Pine oil, due to the content of bornyl acetate and the mixture of aldehydes, has a penetrating, specific smell, with decongestant action and antiseptic effect. It is rich in vitamin C and other Composition with tonic and vitaminizing effect, helping to increase the body's defense capacity. The syrup improves the respiratory function and favors the elimination of toxins by protecting the urinary tract being recognized as a body detoxifier, helping to improve kidney function.

Use: **Adults:** 1 tablespoon 3-4 times a day.
Children over 1 year: 1 teaspoon 3-4 times a day.

Packaging: 150 ml bottle

ImunoTIS Propolis Phytocomplex syrup

ImunoTIS PROPOLIS is recommended for increasing the body's resistance against infections, in cases of flu, anemia, asthenia and convalescence.

Composition: *Propolis cera* extract 15%, *Hippophae rhamnoides* fruit extract 5%, *Echinacea purpurea* flower extract 3%, *Albies alba* bud extract 2% and excipients (honey).

Properties:

Propolis cera extract is rich in flavonoid derivatives and caffeic acid. By the association of the extracts, the syrup stimulates the body's defense capacity.

Hippophae rhamnoides fruit extract supports the immune system.

Echinacea purpurea flower extract soothes the irritation of the throat and pharynx and helps the normal functioning of the immune system.

Albies alba bud extract gives a pleasant aroma to the syrup. The syrup does not contain any additional colorants or additives.

Use: **Adults:** 1 teaspoon 3-4 times a day.
Children over one year: 1 teaspoon 2 times a day.

Packaging: 150 ml bottle

ImunoTIS Phytocomplex syrup

ImunoTIS contains active herbal ingredients with complementary and synergetic properties that support the body's immunity.

Composition: *Glycyrrhiza glabra* extract 20%, *Echinacea purpurea* flower extract 15%, *Hippophae rhamnoides* fruit extract 3% and excipients.

Properties:

Glycyrrhiza glabra extract is a general tonic and flavoring.

Echinacea purpurea flower extract has an antioxidant role and stimulates the body's natural defense capacity.

Hippophae rhamnoides fruit extract contains natural vitamins and has a tonic effect.

Use:

Adults: one tablespoon 3 times a day
Children over 1 year: one teaspoon 3 times a day.

Packaging: 150 ml bottle

VitaforTIS Phytocomplex syrup

Phytocomplex syrup with antioxidant, tonic, hypoglycemic, vasoprotective properties, improves peripheral circulation, increases visual acuity.

Composition: *Vaccinium myrtillus* fruit extract 10%, *Hippophae rhamnoides* fruit extract 6%, *Rosa canina* fruit extract 5% and excipients. It does not contain sugar.

Properties: *Vaccinium myrtillus* fruit extract due to their content in myrtillin and neomyrtillin, have hypoglycemic properties, while anthocyanosides protect the ocular vasculature by activating the regeneration of retinal purpura and through angioprotective qualities. *Hippophae rhamnoides* fruit extract contains significant amounts of vitamin C, carotenoids, vitamin E, as well as smaller amounts of vitamin B1, vitamin B2, vitamin B6, nicotinic acid, inositol, vitamin F. *Rosa canina* fruit extract is known for the large amount of vitamin C, along with vitamin A, vitamins B, E, K and P, riboflavin and nicotinic acid, being used in traditional medicine for the vitaminizing action and for increasing the body's resistance.

Use: **Adults:** 2 teaspoons 3 times a day.
Children over 2 years: one teaspoon 3 times a day.

Packaging: 150 ml bottle

ImunoTIS Junior Phytocomplex syrup

ImunoTIS Junior contains active herbal ingredients with complementary and synergetic properties that support the body's immunity. The syrup is specially formulated for children.

Composition: *Rosa canina* fruit extract 15%, *Hippophae rhamnoides* fruit extract 5%, *Echinacea purpurea* flower extract 3%, vitamin C 1% and excipients (honey).

Properties:

Rosa canina fruit extract contains vitamins C, A, B, E, K, P, having vitaminizing action.

Hippophae rhamnoides fruit extract has an antioxidant role and stimulates the natural defense capacity of the organism.

Echinacea purpurea flower extract has an antioxidant role and stimulates the body's natural defense capacity.

Use:

Children 1-3 years: 2.5 ml of syrup per day
Children 4-10 years: 5 ml of syrup per day
Children over 11 years and Adults: 10 ml of syrup per day.

Packaging: 150 ml bottle

CalmoTIS- Phytocomplex syrup

CalmoTIS contains active herbal ingredients with complementary and synergetic properties having an emollient and calming effect on cough.

Composition:

Plantago lanceolata leaf extract 15%, *Propolis cera* extract 1.5%, honey and excipients.

Properties:

Plantago lanceolata leaf extract helps in case of throat and pharynx irritation. It is pleasant and has a soothing effect on the throat, pharynx and vocal cords.

Propolis cera extract supports the body's natural defense mechanism, especially in the respiratory tract.

Use:

Adults: 1 tablespoon 3-4 times a day.
Children over 1 year: 1 teaspoon 3 times a day.

Packaging: 150 ml bottle

PlanTIS Phytocomplex syrup

PlanTIS contains active herbal ingredients with complementary and synergetic properties that improve respiratory function, help calm coughs and increase the body's defense capacity.

Composition: *Plantago lanceolata* extract 10%, *Thymus vulgaris* extract 2%, *Glycyrrhiza glabra* extract 2%, *Echinacea purpurea* flower extract 2%, *Tilia sp.* extract 1%, *Hippophae rhamnoides* fruit extract 0.5 % and excipients.

Properties:

Plantago lanceolata extract has emollient and decongestant properties on the respiratory tract mucosa. *Thymus vulgaris* extract has a calming effect on coughs. *Echinacea purpurea* extract has an antioxidant role and stimulates the body's natural defense capacity. *Glycyrrhiza glabra* extract is a general tonic and flavoring. *Tilia sp.* extract is emollient and flavoring. *Hippophae rhamnoides* extract contains natural vitamins and has a tonic effect.

Use: Adults: one tablespoon 3-4 times a day.
Children over 1 year: one teaspoon 3-4 times a day.

Packaging: 150 ml bottle

Syrups

BronhoTIS Phytocomplex syrup

BronhoTIS contains active herbal ingredients with complementary and synergetic properties that maintain the health of the respiratory tract. It can be used in dry cough, to ease and refresh breathing, in respiratory infections, colds and flu.

Composition: *Abies alba* bud extract 8%, *Hippophae rhamnoides* fruit extract 1% and excipients.

Properties:

Abies alba extract strengthens the lungs, restores the quality of the voice, supports the body's resistance to the action of unfavorable factors.

Hippophae rhamnoides fruit extract has an antioxidant role and stimulates the natural defense capacity of the organism.

Use:

Adults: 1 tablespoon 3-4 times a day.

Children over 1 year: 1 teaspoon 2-3 times a day.

Packaging: 150 ml bottle

BioforTIS Phytocomplex syrup

BIOFORTIS contains active herbal ingredients with complementary and synergetic properties that stimulates the body's defense capacity and can be used as adjuvant in the treatment of coughs. It can also be used as antiseptic of the urinary tract, against kidney stones and sand.

Composition: *Pinus sylvestris* bud extract 7%, *Propolis cera* pextract 5%, *Juniperus communis* fruit extract 3% and excipients.

Properties: BioforTIS contains active herbal ingredients with complementary and synergistic properties that contribute to the normal functioning of the respiratory tract. *Pinus sylvestris* bud extract: supports the health of the respiratory system, eases breathing, restores the clarity of the voice, helps with throat irritation. *Propolis cera* extract: supports the body's natural defense mechanism, especially in the respiratory tract. *Juniperus communis* fruit extract: supports the immunity/defense capacity of the organism and its resistance to the action of free radicals; supports the drainage function (renal removal of water).

Use: Adults: 3-4 tablespoons per day.

Children: 1-2 teaspoons per day.

Packaging: 150 ml bottle

Propolis Cera extract

TISOFIT Propolis Cera extract sustains the body's natural defence mechanisms (especially on the respiratory tract).

Composition: 1 ml of *Propolis cera* extract contains: 300mg of propolis, corresponding to 40 mg flavonoids; solvent: propylene glycol.

Use:

Internal use :

- enhances the body's natural defence capacity;
- sustains the body's natural defence mechanisms (especially on the respiratory tract).

External use:

- minor cuts, rashes and irritations.

Advantages:

TISOFIT Propolis Cera extract does not contain alcohol. Thus it can be used:

- by children or people with alcohol intolerance or contraindication;
- in higher doses (with medical advice), having with no alcohol-related effects (for example: by car drivers);
- externally, on skin areas.

Packaging: 30 mL pipette vial

Echinacea purpurea extract

Recommended for complementary and preventive therapy of recurrent respiratory infections.

Composition: Echinacea purpurea hydroalcoholic extract 45%.

Properties:

Echinacea purpurea is a medicinal plant with immune-stimulating action, useful to sustain the body's natural defence mechanisms; it enhances the natural defence capacity, in case of upper respiratory infections or flu;

Use:

1 dose = 20 drops, corresponding to 0,135 g of plant.

Adults: 1 dose (20 drops) 3 times a day

Children: ½ dose (10 drops) 3 times a day

Packaging: 50 mL bottle

30% Propolis cera tincture

Recommended to enhance the natural defence capacity, against infections or as an adjunct to flu, colds, acute and chronic rhinitis.

Composition: *Propolis cera* hydroalcoholic extract 30%.

Properties:

- enhances the natural defence capacity against infections;
- has hepatoprotective role;
- adjuvant to flu, colds, respiratory diseases;
- it can be used in acute and chronic rhinitis, acute tonsillitis, acute and chronic colitis, chronic enterocolitis and giardiasis.

Use:

Adults: 20 drops 3 times a day

Children over 3 years old: 10 drops 3 times a day

Children between 1 and 3 years old: 5 drops 3 times a day.

Packaging: 25 mL bottle

Vaccinium vitis-idaea extract

Urinary antiseptic. Adjuvant in urinary infections treatment.

Composition: *Vaccinium vitis-idaea* leaf hydroalcoholic extract 35%.

The extract is standardized in bioactive compounds (hydroquinone derivatives and phenolic acids), with urinary antiseptic properties.

Recommendation:

- mild urinary infections: 7 days treatment; if the infection persists, you should consult your physician and take the extract further as an adjuvant;
- severe acute infections: the product can be used as an adjuvant to antibiotic treatment.

Use:

Adults: 1/2 teaspoon in one glass of water, 3 times a day;

Children: half of the adult doses.

Packaging: 50 mL bottle

Inhalant

TISOFIT Inhalant is a support of the respiratory system, by releasing the upper respiratory tract and contributes to the body's natural defence.

Composition: *Mentha piperita* leaf extract, *Pinus sylvestris* bud extract, *Albies alba* bud extract, *Melissa officinalis* flower extract, *Populus nigra* bud extract, *Juniperus communis* fruits extract, *Matricaria recutita* flower extract, *Lavandula angustifolia* flower extract, *Propolis cera* extract, *Pinus aetheroleum*, *Eucalyptus aetheroleum*.

Properties: The product contains a combination of plant extracts (*Mentha piperita*, *Pinus sylvestris*, *Albies alba*, *Melissa officinalis*, *Populus nigra*, *Juniperus communis*, *Matricaria recutita*, *Lavandula angustifolia*, *Propolis cera*), eucalyptus pine and essential oils (*Pinus aetheroleum*, *Eucalyptus aetheroleum*).

Recommended for colds, acute and subacute inflammatory processes of the upper respiratory tract.

Use: *Adults:* 35-40 drops in a glass of water or in a teaspoon of honey 3 times a day. *Children over 6 years:* 5 drops diluted in a glass of water or in a teaspoon of honey 2 times a day.

The product can also be used for inhalations, 1-2 times a day, preferably in the evening, before going to bed. Add half a bottle of Inhalant to a hot pot containing a liter of hot water. The released vapors are inhaled for 5-10 minutes.

Packaging: 25 ml bottle

Hippophae rhamnoides oil extract

Tonic, anti-anemic, vitaminizing product. Stimulates liver detoxification function. Protects the gastric mucosa.

Composition: *Hippophae rhamnoides* oil extract (47 g plant/ 100 ml extract).

Properties:

Due to the rich content of vitamins (A and E), beta-carotenes, polyphenols and flavonoids, the product:

- slows down the aging process (it has antioxidant properties);
- supports the body's immune system;
- constitutes a body tonic.

Use:

Adults: ½ teaspoon 3 times a day
Children: 5-10 drops 3 times a day.

Packaging: 50 mL bottle

OROTIS - throat spray

OROTIS spray is intended for sore throat care. The product restores the physiological condition of the mucous membrane thanks to the combination of *Tilia cordata* and *Glycyrrhiza glabra* extracts. *Plantago lanceolata* extract activates cellular regeneration processes, speeding up the healing process.

Composition: *Propolis cera* extract, *Plantago lanceolata* leaf extract, *Glycyrrhiza glabra* extract, *Geum urbanum* extract, *Tilia cordata* extract, *Hyssopus officinalis* extract and excipients (honey).

Properties:

The composition of the extracts have antiseptic, astringent, decongestant properties and anti-inflammatory action.

Propolis cera extract stimulates local immune response and increases resistance to bacterial and viral infections. Propolis is used in the treatment of laryngitis and pharyngitis that have atrophic changes (severe or reduced) of the mucous lining the airways.

OROTIS supports the proper functioning of the respiratory system (with action at the throat level).

It has a pleasant, aromatic taste.

IT DOES NOT CONTAIN PRESERVATIVES.

Use: *Adults and children over 12 years:* apply directly to the affected area, 3 sprays (approximately 0.3 mL 3 times a day).

Precautions: Do not use during pregnancy and breastfeeding, in children under 12 years old. Contraindicated to people allergic to bee products or any of the other ingredients. Contraindicated for people with fructose intolerance. Contraindicated for people with diabetes.

Packaging: 20 ml spray.

MEDICAL DEVICES

Hemoplop TIS – Antihemorrhoid ointment

Hemoplop TIS -Antihemorrhoid ointment has lubricating, moisturizing and protective properties; it calms local congestion and alleviates local discomfort (removes itching, pain and stinging sensations); accelerates the natural healing processes, promoting anal mucosa restoration.

Composition:

Propolis cera extract, *Plantago lanceolata* extract, *Populus* sp. bud extract, *Achillea millefolium* extract, excipients.

Indications:

Hemoplop TIS – Antihemorrhoid ointment can be used as an adjuvant:

- in the treatment of anal mucosa disorders: internal and external hemorrhoids, anal fissures and fistula;
- after proctological surgical interventions;
- to restoring the fragile and dehydrated anal mucosa, in elderly or bedridden patients.

Hemoplop TIS – Antihemorrhoid ointment can be used concomitantly or alternatively with Hemoplop TIS – Propolis Suppositories.

Packaging: 50 ml tube.

Glycerin suppositories, for adults

Glycerin Suppositories stimulate bowel evacuation by having emollient and lubricating effect.

Glycerin suppositories, for adults, can be used in case of constipation, after surgery or before endoscopic examination of the rectum.

Composition: each suppository contains: glycerin (2100mg), stearic acid, sodium carbonate and purified water.

Packaging: 2 blisters x 5 suppositories

Hemoplop TIS – Propolis suppositories

Hemoplop TIS – Propolis suppositories has lubricating, moisturizing and protective properties; it calms local congestion and alleviates local discomfort (removes itching, pain and stinging sensations); accelerates the natural healing processes, promoting anal mucosa restoration.

Composition:

Propolis cera extract, *Plantago lanceolata* extract, *Populus* sp. bud extract, excipients.

Indications:

Hemoplop TIS – Propolis suppositories can be used as an adjuvant:

- in the treatment of anal mucosa disorders: internal and external hemorrhoids, anal fissures and fistula;
- after proctological surgical interventions;
- to restoring the fragile and dehydrated anal mucosa, in elderly or bedridden patients.

Hemoplop TIS – Propolis Suppositories can be used concomitantly or alternatively with Hemoplop TIS – Antihemorrhoid ointment.

Packaging: 2 blisters x 5 suppositories

Glycerin suppositories, for children

Glycerin Suppositories stimulate bowel evacuation by having emollient and lubricating effect.

Glycerin suppositories, for children, can be used in case of constipation, after surgery or before endoscopic examination of the rectum.

Composition: each suppository contains: glycerin (1400mg), stearic acid, sodium carbonate and purified water.

Packaging: 2 blisters x 5 suppositories

MEDICAL DEVICES

RINOTISOL, nasal drops

RINOTISOL, nasal drops, can be used locally, in the nasal cavity; it cleans and protects the nasal mucosa and the respiratory tract.

Composition: aqueous propolis extract and excipients.

Properties: RINOTISOL, nasal drops contains aqueous propolis extract, enriched in soluble active compounds, with anti-inflammatory and healing activity. The product can be used in prophylactic treatments, alone or in combination with other nasal solutions. RINOTISOL reduces the use of nasopharyngeal disinfectant/ vasoconstrictive substances. It is compatible with the nasal mucosa (the pH value is similar to the physiological one). RINOTISOL is a natural, non-toxic product.

Indications:

Recommended in the curative and prophylactic treatment of upper airways disorders:

- promotes nasal mucosa restoration, following surgery;
- sustains the nasal mucosa, in various disorders (atrophic rhinitis, ozena, septum ulcers, recurrent epistaxis);
- enhances the local immunity.

Use: children 1-3 years of age: 1 drop in each nostril, 2 times/day, 10 days; children over 3 years of age: 1-2 drops in each nostril, 3 times/day, 10 days; Adults: 2-3 drops in each nostril, 3-4 times /day, 10 days.

Packaging: 10 ml pipette vial

HYAGINOL, vaginal gel with hyaluronic acid

Vaginal Gel with moisturizing and protective properties.

Composition: sodium hyaluronate, lactic acid, *Calendula officinalis* extract and excipients.

Properties:

Hyaginol restores the elasticity and suppleness of vaginal mucosa, especially in premenopausal or postmenopausal period; it replaces natural physiological secretions; it is a hydrophilic gel, vaginal mucosa compatible, with a pH value close to the physiological one. Sodium hyaluronate promotes the natural moisturizing process.

Indications:

The product can be used:

- in case of insufficient vaginal secretions (vaginitis, menopausal disorders, diabetes, after surgeries);
- as a lubricant, in order to facilitate the vaginal insertion of medical devices (thermometers, cannulae, endoscopes).

Packaging: 40 ml tube

HYATISOL, nasal drops

Nasal solution, with sodium hyaluronate-a natural polymer normally found in the human body.

Composition: sodium hyaluronate 0.04% and excipients.

Properties:

Due to its composition, HYATISOL moisturizes and improves cell cilia function, it preserves the integrity, elasticity and moisture of the nasal mucosa.

HYATISOL is compatible with the nasal mucosa, because it is an isotonic solution with a pH value close to the physiological one.

Non-toxic product!

Indications: HYATISOL acts as a nasal mucosa moisturizer, contributing to a normal functional breathing. Frequently, due to harmful external factors (pollution, dry air, air conditioning, pollen, cold) or certain diseases related to abusive drug administration, the nasal mucosa loses its natural moisture. Suitable for the long-term moisture of the nasal mucosa.

Use: 2-3 drops instillations, when needed.

Packaging: 10 ml bottle

CERATIS, ear drops

CERATIS, ear drops can be used to maintain a proper ear hygiene, for ear canal cleaning, to prevent the formation of wax plugs and to rejuvenate the ear canal skin, affected by local eczema (caused by irritating medicinal or cosmetic substances, by prolonged local irritation or by certain equipments) or general irritation (contact eczema, microbial eczema, seborrheic eczema, endogenous eczema).

Composition: boric acid, natural herbal extracts (*Salix alba* sp., *Quercus robur* sp.), glycerin and excipients.

Properties: CERATIS, ear drops is a glycerin solution intended for the use in the auricular cavity, on the intact skin with moisturizing, emollient and antiseptic properties.

Indications: It favors the regeneration and scarring of the skin of the external auditory canal in the following cases:

- the presence of endogenous foreign bodies (cerumen or epidermal plug), prevents the formation of plugs;
- the existence of exogenous foreign bodies of animal nature, for their inactivation and removal;
- traumas caused by hard foreign bodies (pins, toothpicks, clips, balls) and injuries from prostheses or helmets;
- external ear eczema, diffuse otitis externa, external auditory furuncle;
- ear irritations susceptible (prone) or not to superinfections;

Use: 3-4 drops/3 times/day, in cases of cleaning and maintenance of the external auditory canal; 5-6 drops, in the case of foreign bodies existing in the auricular cavity; -auricular plastering, in the case of dry skin of the external auditory canal and in the case of traces of cerumen on the wall of the canal.

Packaging: 20 ml bottle

Official products

OXYGENATED WATER 3%

Local antiseptic and hemostatic.

Composition: hydrogen peroxide 3%.

Properties: local antiseptic and hemostatic, bleaching agent and deodorant.

Indications: external use, in the local treatment of wounds.

Use: apply externally on the affected areas.

Packaging: 170 ml bottle.

OXYGENATED WATER 3%

Local antiseptic and hemostatic

Composition: hydrogen peroxide 3%.

Properties: local antiseptic and hemostatic, bleaching agent and deodorant.

Indications: external use, in the local treatment of wounds.

Use: apply externally on the affected areas.

Packaging: 1000 ml bottle.

RIVANOL 0.1 %

Antiseptic, mycostatic, bactericidal, non-irritating and non-toxic

Composition: 6, 9-diamino-2-ethyl acridine lactate 0.1%

Properties: antiseptic, mycostatic, bactericidal, non-irritating and non-toxic.

Indications: external use, in skin infections, infected eczema, mycotic dermatitis.

Use: apply externally in the form of compresses.

Packaging: 200 ml bottle.

RIVANOL 0.1 %

Antiseptic, mycostatic, bactericidal, non-irritating and non-toxic

Composition: 6, 9-diamino-2-ethyl acridine lactate 0.1%

Properties: antiseptic, mycostatic, bactericidal, non-irritating and non-toxic.

Indications: external use, in skin infections, infected eczema, mycotic dermatitis.

Use: apply externally in the form of compresses.

Packaging: 200 ml bottle.

Methylene blue 1 %

Antiseptic.

Composition: methylene blue 1%.

Properties: antiseptic.

Indications: skin disinfection.

Packaging: 25 ml bottle

Methylene blue 1 %

Antiseptic.

Composition: methylene blue 1%.

Properties: antiseptic.

Indications: skin disinfection.

Packaging: 100 ml bottle

Official products

Gentian violet 1%

Local antiseptic, antifungal and bactericidal against gram-positive germs.

Composition: gentian violet 1%.

Properties: local antiseptic, antifungal and bactericidal against gram-positive germs.

Indications: dermatological conditions, skin ulcerations, pyoderma, stomatitis.

Packaging: 25 ml bottle

Iodine Tincture 2%

Local antiseptic, antifungal and anticonvulsant.

Composition: iodine, potassium iodine, ethyl alcohol 50%.

Properties: local antiseptic, antimycotic and revulsive.

Indications: disinfectant in dermatological conditions.

Packaging: bottle x 50 ml

Boric alcohol 4%

Antiseptic solution, recommended for external use, ideal for washing infected wounds.

Composition: boric acid, ethyl alcohol 96%, purified water.

Properties: local antiseptic.

Indications: dermatological conditions of the external auditory canal.

Use: it is administered at the level of the external auditory canal 2-3 times a day, 4-5 drops of solution, previously heated to body temperature.

Packaging: 15 ml bottle.

CASTELANI SOLUTION

Local antimycotic.

Composition: fuchsin, boric acid, resorcinol, phenol.

Properties: antifungal, keratolytic, antiseptic and local disinfectant.

Indications: in the treatment of mycoses (epidermophytes). Do not apply on open wounds!

Packaging: 25 ml bottle.

Iodine Tincture 2%

Local antiseptic, antifungal and anticonvulsant.

Composition: iodine, potassium iodine, ethyl alcohol 50%.

Properties: local antiseptic, antimycotic and revulsive.

Indications: disinfectant in dermatological conditions.

Packaging: bottle x 100 ml

Castor Oil x 25 ml

Indications:

Internal use: a single purgative administration in the case of acute constipation, various intoxications

External use: strengthening nails and hair roots, eyelash maintenance.

Internal use:

Adults: 15-30g (1-2 spoons);

Children over 2 years: 5-15 g;

It is administered in the morning on an empty stomach. The effect of total elimination of the intestinal contents occurs in 2-6 hours after administration.

External use: local applications

Contraindications: acute abdomen, ulcerative colitis, acute appendicitis, pregnancy, breastfeeding women. Do not associate with broad-spectrum antibiotics, it causes diarrhea.

Packaging: 25 ml bottle

Official products

Castor Oil x 100 ml

Indications: Internal Use: a single purgative administration in the case of acute constipation, various intoxications

External Use: strengthening nails and hair roots, eyelash maintenance.

Internal use:

Adults: 15-30g (1-2 spoons)

Children over 2 years: 5-15 g

It is administered in the morning on an empty stomach. The effect of total elimination of the intestinal contents occurs in 2-6 hours after administration.

External use: local applications

Packaging: 100 ml bottle

Paraffin oil

Composition: paraffin oil

Properties:

-laxative with mechanical action

-lubricant of the contents of the colon

-faecal softening agent

Indications: symptomatic treatment of constipation

Packaging: bottle x 50 ml

Bucotisol, borax glycerin

Composition: glycerin, borax, *Plantago lanceolata* extract.

Properties: The product is designed for oral hygiene, suitable for gums and oral cavity application. The herbal extract has a complex composition, thus providing anti-inflammatory, analgesic and healing properties.

Indications: oral cavity hygiene

Use: plastering the oral cavity and gums.

Do not consume liquids or food for at least 30 minutes after use!

Packaging: 100 ml bottle

Menthotis, mentholated lotion

Composition: alcohol, *Mentha piperita* leaf extract, *Melissa officinalis* leaf extract, menthol.

Properties: It has soothing properties, with a cooling effect on the skin in case of insect bites. It also reduces itching.

Indications: insect bites, itching

Use: local applications, when needed.

Packaging: 100 ml bottle

Castor Oil x 1000 ml

Indications: Internal use: a single purgative administration in the case of acute constipation, various intoxications

External use: strengthening nails and hair roots, eyelash maintenance.

Internal use: *Adults:* 15-30g (1-2 spoons)

Children over 2 years: 5-15 g

It is administered in the morning on an empty stomach. The effect of total elimination of the intestinal contents occurs in 2-6 hours after administration.

External use: local applications

Contraindications: acute abdomen, ulcerative colitis, acute appendicitis, pregnancy, breastfeeding women. Do not associate with broad-spectrum antibiotics, it causes diarrhea.

Packaging: 1000 ml bottle

Paraffin oil

Composition: paraffin oil

Properties:

-laxative with mechanical action

-lubricant of the contents of the colon

-faecal softening agent

Indications: symptomatic treatment of constipation

Packaging: 1000 ml bottle

Zinc oxide and menthol suspen

Composition: zinc oxide, glycerin, menthol.

Properties:

It stimulates blood circulation, induces a cooling sensation, reduces muscle contractions and soothes itching.

Glycerin hydrates and softens the skin and zinc oxide, thanks to its anti-inflammatory properties, soothes skin irritations.

Indications: skin irritations, insect bites

Use: local applications, when needed.

Packaging: 100 ml bottle

KETOPROFEN TIS 25mg/g, gel

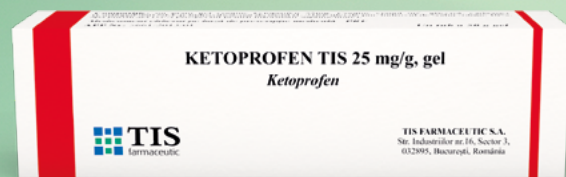

The active substance -ketoprofen- is a nonsteroidal anti-inflammatory agent, which reduces inflammation and relieves pain.

Composition: ketoprofen 2.5% and excipients.

Indications:

KETOPROFEN TIS, gel is recommended for adults and children over 15 years of age, in the treatment of:

- traumatic muscle, bones and joint pain (contusions, sprains, strains);
- rheumatic muscle, bones and joint pain (inflammatory joint diseases such as rheumatoid arthritis, ankylosing spondylitis, acute inflammatory arthritis, discopathy, torticollis, acute arthritis including gout).

Packaging: 50 g tube

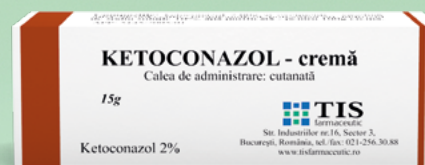

KETOCONAZOL 2%, cream

Antifungal drug for topical use, imidazole and triazole derivative.

Composition: ketoconazol 2% and excipients

Indications:

- dermatophytes skin infections with – *Tinea corporis*, *Tinea cruris*, *Tinea manuum*, *Tinea pedis*, *Tricophyton rubrum*, *Tricophyton mentagrophytes*, *Microsporum* and *Epidermophyton floccosum* spp.;
- treatment of cutaneous candidiasis;
- treatment of *Pityriasis versicolor* and seborrheic dermatitis caused by *Pityrosporum* spp.

Packaging: 15 g tube

ACICLOVIR TIS 50mg/g, cream

Antiviral drug.

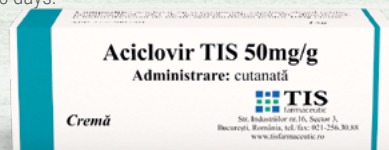

Composition: aciclovir 5% and excipients.

Indications:

Treatment of initial and recurrent skin infections with herpes simplex virus, including genital herpes and herpes labialis.

Use: Apply ACICLOVIR TIS 50 mg/g cream on skin lesions, 5 times a day, every 4 hours, excepting the night period.

Treatment must be started as soon as possible, during the early stages of the infection; the treatment of recurrent episodes should start preferably during the prodromal period or when first lesions occur. Treatment should be continued for 5 days. If the symptoms do not improve after 5 days, treatment duration can be increased by other 5 days.

Packaging: 15 g tube

FLUIDOL 100mg/5ml syrup

Expectorant and mucolytic syrup for children.

Composition: carbocisteine 2% and excipients.

Indications: FLUIDOL 100mg/5mL syrup is recommended for children and infants, in the treatment of acute respiratory diseases, with expectoration difficulties (ie elimination of bronchial mucus).

Use: A measuring cup of FLUIDOL 100mg/5mL, syrup (5 ml) contains 100 mg carbocisteine.

- children over 5 years of age: 100 mg carbocisteine, 3 times/ day;
- children between 2-5 years of age: 100 mg carbocisteine, 2 times/ day;
- infants and children between 1 month and 2 years of age: 20-30 mg carbocisteine/ kg/ day, in one or two trances, but not more than 100 mg;

The treatment should not exceed 5 days, without medical prescription.

Packaging: 100 ml bottle

PROCLORPERAZINA TIS 5 mg, suppositories

PROCLORPERAZINA TIS 5 mg, suppositories belongs to the group of drugs known as: antipsychotics, phenothiazines with a piperazine structure, antiemetics and anti-nausea drugs.

Composition: each suppository contains prochlorperazine 5 mg (in the form of prochlorperazine maleate 8.1 mg) and excipients.

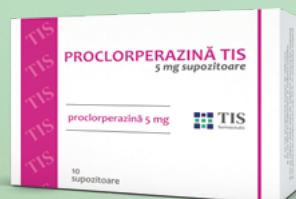

Indications:

- for the prevention and treatment of vomiting of various causes: postoperative and postanesthetic, in uremia, in irradiation disease, in gastroenteritis and in vomiting caused by different drugs;
- migraine, Meniere's vertigo.

Use: Adults:

- as an antiemetic: the recommended dose is 5-10 mg prochlorperazine 2-4 times a day;
- for the treatment of vertigo: the recommended dose is 15-30 mg prochlorperazine per day divided into several doses.

Children: The recommended dose is 0.25 mg prochlorperazine/kg 2-3 times a day. The medicine is not recommended for children under 1 year of age or weighing less than 10 kg.

Packaging: box with two blisters of 5 suppositories

TISALGIN 300 mg suppositories

TISALGIN 300 mg belongs to the group of drugs known as: analgesics and antipyretics. It relieves pain and reduces body temperature in case of fever.

Composition: each suppository contains metamizole sodium 300 mg and excipients.

Indications:

- acute severe post-injury or postoperative pain; colic; tumor-caused pain; other severe acute or chronic pain, when other therapeutic means are not indicated.
- relieves fever, when it does not respond to other treatment.

Use:

Children over 4 years old to 15 years old: The usual dose is one suppository TISALGIN 300 mg as needed, administered rectally. If necessary, the dose can be repeated after at least 6 hours, without exceeding 4 TISALGIN 300 mg suppositories per day.

Packaging:

- box with two blisters of 3 suppositories
- box with two blisters of 5 suppositories

OTIS-T, ear drops solution

Ear drops, combination of corticosteroids and anti-infectives.

Composition: fluocinolone acetonide 0.05%, chloramphenicol 0.5%, lidocaine hydrochloride 1% and excipients.

Indications:

OTIS-T, ear drops, solution is indicated in the treatment of ear inflammatory-infective conditions, especially in the external auditory meatus; as local treatment associated with systemic treatment (with antibiotics and anti-inflammatory agents); particularly, infectious eczema ear canal.

Use:

- **Adults:** the recommended dose is 6-8 drops 2-3 times a day;
 - **Children:** the recommended dose is 2-4 drops 2-3 times a day.
- If not other prescribed, the treatment will not exceed 10 days.

Packaging: 10 ml bottle

PLANTAGINOL, syrup

PLANTAGINOL, syrup has expectorant action, soothing the sore airway mucosa. The plantain extract contains natural active compounds, such as aucubin, tannins and mucilages, which provides the syrup with expectorant action. Thus, *Plantaginol* liquefies and stimulates tracheobronchial secretion and decongests airway mucosa.

Composition: *plantago lanceolata* extract 20% and excipients.

Indications:

Plantaginol is indicated in inflammatory acute, subacute and chronic respiratory diseases (bronchitis, laryngitis), accompanied by cough.

Use:

- Adults: 3-4 spoons of syrup/ day;
- Children over 1 year of age: 4-5 spoons of syrup/ day.

Packaging: 100 ml bottle

PlantagoTIS, 20% plantain gel

PlantagoTIS can be used in dermatological therapy, for its healing and antimicrobial action, due to the bioactive phytocomplex from *Plantago lanceolatae folium* liquid extract: polyphenolic compounds (flavones, polycarboxylic acids, tannins), iridoids derivatives (aucubin), carotenoids, fatty acids, phytosterols, vitamin K, etc.

Composition: *plantago lanceolata* leaf extract 20% and excipients.

Indications:

- in the treatment of superficial burns, excoriations, wounds and skin graft during cicatrisation phase.
- in the treatment of: secondary erythema due to radiotherapy and any other erythema; 1st and 2nd degree burns of various etiologies (sunburns, thermal burns, chemical burns, electrical burns); diabetic ulcer, arterial ulcer, venous ulcer, pressure sores; graft donor areas; other skin lesions (excoriations, abrasions, etc.); minor mucosa inflammation.

Use: *PlantagoTIS* can be used as such or in combination with allopathic medicines. Apply to the affected skin areas. The administration, the frequency and the duration of treatment may vary according to the nature of the disease and the application site. It can be easily removed by simple washing.

Packaging: 20 g tube

CALMOFLUID-T, syrup

Expectorant syrup.

Composition: 100 ml of syrup contain 12,227g *Plantago lanceolata* leaf extract, 12,227g, *Glycyrrhiza glabra* extract and 0,611 g ammonium chloride.

Indications:

Bronchopulmonary disorders with viscous sputum, that cannot be eliminated through the mucociliary clearance process and by cough: tracheobronchitis, acute or chronic bronchitis, accompanied by irritating cough; in the prophylaxis of complications related to pre and postoperative cough effort.

Use:

- adults and children over 10 years of age: 10 ml of syrup, 3-4 times/day
- children over 3 years of age: 5 ml of syrup, 4 times/day
- children between 1-3 years of age: 2.5 ml of syrup, 3 times/day

Calmofluid-T, syrup is not recommended for prolonged use or in higher doses than those indicated.

Packaging: 100 ml bottle

FLAVOSOL 300 mg/ml, oral drops, solution

Flavosol 300mg/ml, oral drops, solution is a propolis based medicine, having antibacterial and antiviral properties.

Composition: 1 ml of oral drops, solution contains 300 mg of propolis and excipients.

Indications: Flavosol 300 mg/mL, oral drops, solution can be used as an adjuvant, in the treatment of acute and chronic rhinopharyngitis, angina tonsillar, pharyngeal angina, chronic rhinitis, intestinal infections (colitis, enterocolitis).

Use: This medicine is intended for oral use only.

- Adults: 1 to 3 ml oral drops, solution (30-90 drops), 3 times a day, for 10 days.
- Teenagers (over 12 years of age): 0.5 to 1.5 ml oral drops, solution (15-45 drops), 3 times a day, for 10 days.

Shake the bottle before use. Apply Flavosol 300 mg/mL, oral drops on bread-crum or some sugar or honey, to make it easier to swallow.

If your symptoms worsen or do not improve after 3 days, you must contact your therapist.

Packaging: 25 ml bottle

BROMHEXIN-T oral drops solution, 2 mg/ml

BROMHEXIN-T oral drops solution, 2mg/ml is a mucolytic drug.

Composition: bromhexine hydrochloride 0.2% and excipients.

Indications: BROMHEXIN-T oral drops solution, 2 mg/ml is indicated in bronchopulmonary diseases with viscous secretions: acute bronchitis, chronic bronchitis, tracheobronchitis, chronic obstructive bronchopneumopathy ingravescence.

Use: 1 ml BROMHEXIN-T oral drops solution 2 mg/ml, corresponds to 20 drops.

• *Children aged 1-5 years:* 1 ml (20 drops), 3-4 times a day; • *Children aged 5-10 years:* 2 ml (40 drops), 3 times a day; • *Children over 12 years of age and adults:* 4 ml (80 drops), 3 times a day.

The daily therapeutic dose should be adjusted on a case by case basis, depending on individual tolerance, under medical advice. Doses above are indicated in the treatment of acute respiratory diseases. Treatment for chronic conditions may continue for the further 10 days, but only under medical advice.

Packaging: 50 ml bottle.

AMBROXOL 0.75%, oral drops, solution

AMBROXOL 0.75%, oral drops, solution belongs to a group of medicines indicated in cough treatment: mucolytic agents.

Composition: ambroxol hydrochloride 0.75% and excipients.

Indications: Treatment of bronchial secretion disorders (viscous sputum), especially in acute bronchial disease and chronic bronchopneumopathy ingravescence.

It can be taken pre-and postoperative for prevention of respiratory complications.

Use: 1 ml of AMBROXOL 0.75%, oral drops, solution contains 7,5 mg of ambroxol hydrochloride. 1 ml of AMBROXOL 0.75%, oral drops, solution corresponds to 20 drops.

• *Children under 2 years of age:* 5-10 drops, 3 times a day.
• *Children aged 2-5 years:* 10-20 drops, 3 times a day.

If not other prescribed, the treatment will not exceed 4-5 days. Treatment duration will be established by the physician.

Packaging: 20 ml bottle

AMBROXOL 0.3%, oral solution

AMBROXOL 0.3%, oral solution belongs to a group of medicines indicated in cough treatment: mucolytic agents.

Composition: ambroxol hydrochloride 0.3% and excipients.

Indications: Treatment of bronchial secretion disorders (viscous sputum), especially in acute bronchial disease and chronic bronchopneumopathy ingravescence. It can be taken pre- and postoperative for prevention of respiratory complications.

Use: A measuring spoon of AMBROXOL 0,3%, oral solution (5 ml) contains 15 mg of ambroxol hydrochloride.

• *Children under 2 years of age:* ½ teaspoon, 2 times a day. • *Children aged 2-5 years:* ½ teaspoon, 3 times a day • *Children aged 5-12 years:* 1 teaspoon, 2-3 times a day. • *Children over 12 of age and adults:* 2 teaspoons, 2-3 times a day.

If not other prescribed, the treatment will not exceed 4-5 days. Treatment duration will be established by the physician.

Packaging: 100 ml bottle

PARACETAMOL TIS 120mg/5ml, syrup

The active substance -paracetamol -belongs to the group of medicines called analgesics-antipyretics.

Composition: paracetamol 2.4% and excipients.

Indications: Paracetamol TIS 120 mg/5 ml, syrup is indicated to relieve mild-to-moderate pain and to reduce fever in children aged 1 month to 12 years.

Use: The recommended doses depend on the child's age and weight:

• *Children aged 1-3 months:* 2.5 ml syrup (60 mg paracetamol) up to 4 times daily;
• *Children aged 3 months-1 year:* 2.5-5 ml syrup (60 - 120 mg paracetamol) up to 4 times daily; • *Children aged 1-6 years:* 5-10 ml syrup (120 - 240 mg paracetamol) up to 4 times daily; • *Children aged 6-12 years:* 10-20 ml syrup (240 - 480 mg paracetamol) up to 4 times daily.

The total dose of paracetamol should not exceed 80 mg / kg / day in children weighing less than 37 kg. In children weighing between 38 kg and 50 kg, the daily dose of paracetamol should not exceed 3 g per day. In children weighing more than 50 kg, the daily dose of paracetamol should not exceed 4 g per day.

Packaging: 100 ml bottle

FLUIDOL 250mg/5ml syrup

Expectorant and mucolytic syrup, for adults.

Composition: carbocisteine 5 % and excipients.

Indications: FLUIDOL 250mg/5mL syrup is recommended for the treatment of acute respiratory diseases, with expectoration difficulties (ie elimination of bronchial mucus).

Use: A measuring cup of FLUIDOL 250mg/5mL syrup (5 ml) contains 250 mg carbocisteine.
– *Adults:* 750mg carbocisteine, 3 times a day.

The treatment should not exceed 5 days, without medical prescription.

Packaging: 100 ml bottle

NASAL DROPS

RHINOIL, nasal drops, solution

Nasal decongestant.

Composition: 100 ml of RHINOIL, nasal drops, solution contain 0.9 g of vitamin A palmitate, 0.8 g of anise oil, 0.7 g of eucalyptus oil, 0.6 g of mint oil, 0.15 g camphor and excipients.

Indications: Adjuvant in the treatment of acute and chronic rhinitis and rhino-pharyngitis, sinusitis, simple chronic atrophic rhinitis, ozena, in postoperative mucosal edema after endonasal surgery.

Use:

– *Children over 7 years of age:* 1-2 drops, in each nostril, as instillation or nasal dabbing, twice a day, for 4 days;
– *Adults:* 2-3 drops, in each nostril, as instillation or nasal dabbing,, 3 times a day, for 5-6 days.

Packaging: 10 ml bottle

RINONEF T, 5mg/ml + 5mg/ml nasal drops, solution

Nasal decongestant.

Composition: ephedrine hydrochloride 0.5%, neomycin sulfate 0.5% and excipients.

Indications: Treatment of acute and chronic rhinitis, caused by gram-positive and gram-negative, sensitive to neomycin bacteria, allergic rhinitis and edema resulting from endonasal surgery.

Use:

– *Children over 12 years of age:* 1 drop in each nostril, 2-4 times a day, for 5 days;
– *Adults:* 1-2 drops in each nostril, 2-5 times a day, for 5-7 days.

Packaging: 10 ml bottle

SER EFEDRINAT 5mg/ml nasal drops, solution

Nasal decongestant.

Composition: ephedrine hydrochloride 0.5 % and excipients.

Indications:

Symptomatic treatment of rhinitis and acute sinusitis, vasomotor rhinitis, edema resulting from endonasal surgery.

Use:

- *Children over 12 years:* 2-3 drops in each nostril, twice a day, for 3 days;
- *Adults:* 3-4 drops in each nostril, three times a day, for 4-5 days.

Packaging: 10 ml bottle

SER EFEDRINAT 10 mg/ml nasal drops, solution

Nasal decongestant.

Composition: ephedrine hydrochloride 1% and excipients.

Indications:

Symptomatic treatment of rhinitis and acute sinusitis, vasomotor rhinitis, edema resulting from endonasal surgery.

Use:

- *Adults:* 3-4 drops in each nostril, three times a day, for 4-5 days.

Packaging: 10 ml bottle

RINOXIN 0.5 mg/ml, nasal drops, solution

Nasal decongestant.

Composition: oxymetazoline hydrochloride 0.05% and excipients.

Indications:

- acute and chronic allergic rhinitis and sinusitis;
- acute and chronic viral rhinitis and sinusitis;
- tubar catarrh;
- nasal and sinus congestion.

Use:

- *Adults:* 2-3 drops in each nostril, 2-3 times a day.
- *Children over 12 years of age:* 1-2 drops in each nostril, 2-3 times a day.

The product is used for a short period of time (4-6 days).

Packaging: 10 ml bottle

RINOXIN 0.25 mg/ml, nasal drops, solution

Nasal decongestant.

Composition: oxymetazoline hydrochloride 0.025% and excipients.

Indications:

- acute and chronic allergic rhinitis and sinusitis;
- acute and chronic viral rhinitis and sinusitis;
- tubar catarrh;
- nasal and sinus congestion.

Use:

- *Adults:* 2-3 drops in each nostril, 3-4 times a day.
- *Children over 7 years of age:* 1-2 drops in each nostril, 2-3 times a day.

The product is used for a short period of time (4-6 days).

Packaging: 10 ml bottle

EAR DROPS

OTOTIS 3 mg/ml + 0.5 mg/ml ear drops, solution

OTOTIS 3 mg/ml + 0.5 mg/ml ear drops, solution is indicated in the treatment of acute and chronic external otitis of bacterial origin, with intact eardrum, for adults and children; particularly ear canal infected eczema.

Composition: ciprofloxacin 0.3%, fluocinolone acetonide 0.05% and excipients.

Indications: Acute and chronic external otitis of bacterial origin, with intact eardrum, in adults and children; particularly, ear canal infected eczema.

Use: 1 ml of solution contains ciprofloxacin 3 mg (in the form of ciprofloxacin hydrochloride 3.33 mg), fluocinolone acetonide 0.5 mg. 1 ml of solution contains 30 drops.

Instillations in the affected ear:

- 3 drops 2 times/day for 7 days in acute external otitis;
- for chronic forms, with an antibiogram of sensitivity to ciprofloxacin, the treatment is extended up to 21 days.

To avoid unwanted contact of the cold solution with the ear, warm the bottle between the hands before use. Bend the head sideways, instill 3 drops and keep the head bent for a few minutes.

Packaging: 10 ml bottle

TOPICAL SOLUTIONS AND GELS

DICLOFENAC TIS 10mg/g, gel

Topical nonsteroidal anti-inflammatory drug.

Composition: diclofenac sodium 1% and excipients (Capsicum annuum, etc.).

Indications: Local symptomatic treatment of:

- muscle pain or rheumatic osteoarticular pain;
- postoperative and posttraumatic edema;
- muscle pain or traumatic osteoarticular pain (mild injuries of tendons, ligaments, etc.).

Use: *Adults:* apply DICLOFENAC TIS 10 mg/g gel, externally 3-4 times a day, to the affected area. The administered dose may vary, depending on the affected area; apply about 2-4 g of gel (corresponding to about 5-10 cm gel).

To achieve the optimal gel absorption, it is recommended to gentle and long-term massage the painful and/or inflamed area.

Packaging: 50 g tube

SALMET-T 20mg/ml, cutaneous solution

SALMET-T, 20 mg/ml, cutaneous solution contains methyl salicylate, an effective pain reliever.

Composition: methyl salicylate 2% and excipients (pine oil, menthol).

Indications: Salmec-T, 20 mg/ml, cutaneous solution can be used in the local treatment of muscles, joints or soft tissues pain, by adults, teenagers and children over 7 years.

Use: *Adults, teenagers and Children over 7 years of age:* apply 2-3 times a day an amount of cutaneous solution enough to cover the affected area in a thin layer, and gently massage until it is absorbed completely.

After each application, wash hands carefully. In case of accidental eye contact, rinse the area with plenty of water.

Packaging: 100 ml bottle

KETO-TIS, hair gel

Antifungal drug for topical use, imidazole and triazole derivative, combination drug.

Composition: ketoconazol 1%, propolis liquid extract 20%, and excipients.

Indications: Local treatment and prophylaxis of certain disorders caused by hyperproliferation of *Pityrosporum ovale*: pityriasis capitis (dandruff), seborrheic dermatitis.

Use: This product is recommended for adults and children over 12 years. Apply Keto-TIS to the affected areas: skin or hair roots, gently massage for about 5 minutes (to soak), then rinse with plenty of warm water. It can be used twice a week, for 30 days, as active treatment, then once a week, depending on the results, for the routine care.

Packaging: 50 g tube

DICLOFENAC Chirmis 10mg/g, gel

Topical nonsteroidal anti-inflammatory drug.

Composition: diclofenac sodium 1% and excipients.

Indications: Local symptomatic treatment of:

- muscle pain or rheumatic osteoarticular pain;
- postoperative and posttraumatic edema;
- muscle pain or traumatic osteoarticular pain (mild injuries of tendons, ligaments, etc.).

Use: – *Adults:* apply DICLOFENAC Chirmis 10 mg/g gel, externally 2-4 times a day, to the affected area.

To achieve the optimal gel absorption, it is recommended to gentle and long-term massage the painful and/or inflamed area. After each application, wash hands carefully. Except the strictly recommended cases, for the treatment of soft tissue trauma or abarticular rheumatism, DICLOFENAC Chirmis 10 mg/g gel should not be used more than 14 days, and for the treatment of arthritis pain, more than 21 days. If your symptoms worsen or do not improve after 5 days, diagnosis and treatment should be reassessed.

Packaging: 50 g tube

Troxeutin Chirmis 20 mg/g, gel

Troxeutin Chirmis 20 mg/g, gel belongs to the group of medicines: agents which increase capillary resistance.

Composition: troxeutin 2% and excipients.

Indications:

- for its protective effect on the capillaries, reduces capillary permeability and edema;
- adjuvant therapy of symptomatic venous disease – varicose veins, hemorrhoids.

Use:

Apply a thin layer of Troxeutin Chirmis 20 mg/g, gel, gel externally, on the areas affected by varicose veins or hemorrhoids – intact skin or anal mucosa. Massage gently. Apply 2 times a day, once in the morning and once in the evening, for 2-3 weeks.

Packaging: 50 g tube

IODINĂ 100 mg/ml, cutaneous solution

Topical antiseptic and disinfectant.

Composition: iodopovidone 10% and excipients.

Indications: Preoperative disinfection of the skin and mucous membranes. Asepsis of superficial wounds, including skin burns. Adjuvant in bacterial and fungal skin infections and mucous membranes susceptible to superinfection. IODINĂ 100 mg/ml, cutaneous solution does not sterilize the skin areas, it only reduces temporarily the number of microorganisms.

Use: IODINĂ 100 mg/ml, cutaneous solution is applied either as such or diluted, depending on the indication and the affected area:

- applied as such, by blotting, for disinfection of intact skin (allow the cutaneous solution to establish contact with the affected area, for 1 to 2 minutes), and in case of minor burns and skin infections (apply the solution 3 to 4 times a day, until the resolution of symptoms is achieved);
- applied 10% diluted (with distilled water or saline solution), for wound washing; applied 2% diluted (normal saline) for wound irrigation. The dilute solution will be prepared only before use.

Packaging: 60, 100, 1000 ml bottles
